1	<b>N K BUILDCON PVT LIMITED, B-62 'UGANTA' , University Marg, Bapu Nagar, Jaipur, Rajasthan</b>	TOR Page No. 1, Para 1 One Kulaba command generally has 40 ha (100 hect) of land	The kulaba Command varies for 10 hect. to 50 hect. is all kulaba are to be redesign for kulaba command 40 hect.	In Uttar Pradesh average command of one cusec kulaba is taken as 40 hectare, bot it has to be planned as per the specific situation of that particulat kulaba.	
		TOR page No. 2, Point 3 The kulaba outlets are constructed by the irrigation Department and are mostly of one cusec.	The discharge mention is very high for 40 hect area. There are few kulaba's where water is reaching rarely or not reaching. Are these Kulaba's are also to be digitized	Yes	
		TOR Page No. 2, Point 3 The command of Kulaba is taken from the irrigation department (31-B)	Full details are not available with UPID specially the traced map of the Kulaba command. Is this will be provided by the revenue department free of cost (with in a time frame).	All maps are not available in digitized format with Revenue Department. The onus of procuring it lies with the selected vendor.	
		TOR Page No. 2, Point 3 The next step is to obtain details of farmers who own the land in this command	Land owner details are not available on NIC site. It is also not available with the irrigation Department where water is not reaching. is this will be provide by the revenue Department free of cost in a time frame manner.	This will be provided free of cost as most of this information is available on site of revenue department, in case it is not there it will be provided by the staff of this department.	
		TOR Page No 2, Point 3 Irrigation water reaches each field in that kulaba command	What will be the minimum irrigated area of a Naka Point, (Field water distribution point). Is Naka point is to be provided for every field is irrespective of the area?	It should be at distance of 250 meters.	
		TOR Page No. 2] Point 4 The agency will also have to identify such kulabas/outlest which are not functional	There are some klaba which are working partly. Is these Kulaba are to be considered for design of field channel.	Yes
