Detailed Project Report

Integrated Watershed Management Programme-I

(IWMP-II)

Year 2009-10

Department of Land Development and Water Resources, Uttar Pradesh

Project Implementing Agency

Bhoomi Sanrakshan Adhikari

L.D.W.R., Chitrkoot-II

CERTIFICATE

This is to be certified that the proposed Project (IWMP-II) comprising ten micro-watersheds of district Chitrakoot, Uttar Pradesh has been selected for its sustainable development on watershed basis under Integrated Watershed Management Programme. The land is physically available for proposed interventions and is not overlapping with any other schemes. It will be developed as per Common Guidelines for Watershed Development Project-2008, GOI, New Delhi. The significant results will be achieved through proposed interventions on soil and water conservation, ground water recharge, availability of drinking and irrigation water, agricultural production systems, live stock, fodder availability, livelihoods of asset less, capacity building, etc. The proposed **Detailed Project Report** of **IWMP-II, 2009-10** is approved for its implementation.

CHAPTER - 1

INTRODUCTION AND BACKGROUND

Status of watershed programme and approved plan by Steering committee, Govt. of India and status of previous Detailed Project Reports for Chitrakoot district of Uttar Pradesh is given in following Tables 1.1, 1.2 and 1.3.

Table 1.1: Status of watershed programme **District- Chitrakoot**

Details	No.	Area (Lac ha)
1	2	3
Total Micro watershed in the district	571	3.16400
Workable Micro Watersheds	431	2.43830
Micro Watersheds already treated by DLWR & other agencies	264	1.60650
Balance Micro Watersheds (MWS) for treatment (Before start of IWMP in Distt.)	167	0.83180

Table 1.2: Approved plan (PPRs) by Steering Committee (SC)/Govt. of India, **District- Chitrakoot**

1.1 Project Background

Integrated Watershed Management Programme-II comprises eight micro-watershed namely Bhoehari Mafi (2C1A3m2b), Ragauli (2C1A3m2e), Chhechhariha Khurd (2C1A3n2d), Budha Semarwar, (2C1A3n2c), Basila (2C1A3k2b), Bhaunri (2C1A3k2j), Bagrehi (2C1A3k2k), Buer (2C1A3n2j), Kothilhai (2C1A3n2e) and Rampur Tarauhan (2C1A3n2h). Watershed project is situated in Pahari, Karwi and Manikpur block of District Chitrakoot and spread over in 28 villages of 13 gram Panchayat. The total geographical area of the IWMP-II is 6242.30 ha, out of which 5150.00 ha is treatable under Integrated Watershed Management Programme (IWMP-II).

Table 1.4: Details of IWMP-II for which this DPR is Prepared

S.N	Watershed project	Micro Watersheds (MWS) detail	Micro watersheds code	Name of Watershed in which MWS is falling (River / Nala name)

1.2 Need and Scope for Watershed Development

Bundelkhand region was in a grip of severe drought continuously from 2004-05 to 2007. In the region, more than 90 per cent of open wells were dried up due to deficit rainfall during drought. Cattle were abandoned due to shortage of water and fodder. Most part of the region was dependent on drinking water supply through tanker. Therefore, management of natural resources on watershed basis is urgent need of the region. Watershed project was selected with following objectives:

Long Term Objectives:

- To optimize productivity of the land
- To restore ecological balance in degraded and fragile eco-system
- To narrow down the disparity between rainfed and irrigated areas
- To create sustained employment opportunities

1.3 Weightage for selection of Watershed

Watershed project was selected on the basis of criteria mentioned in Table 1.5 and composite ranking was developed on the basis of these parameters. The seventeen criteria were taken with total of 205 weightage points. The criterion taken are availability of drinking water, irrigation, degree of soil erosion, water holding capacity, area under rainfed agriculture, status of field bund/contour bund / graded bund, presence of hard rock below the land, options for livelihood, percentage of small and marginal farmers, degraded land, ground water status, status of technical knowledge for improved farming systems, weather conditions, poverty index (% of poor population), virginity of land, productivity potential of land and soil organic carbon status. The weightage for project is about 90 per cent (Table 1.6).

Table 1.5: Criteria and weightage for selection of watershed

S. No.	Criteria	Maximum Score	Range & Score			
1	Drinking water	15	**Very poor** Dependence on water supply through tanker (15)	**Poor** Partial availability within the periphery of 3-4 km (10)	**Good** Round the year availability within the periphery of 3-4 km (5)	**Very Good** Round the year availability in watershed (0)
2	Irrigation	10	No irrigation (10)	Life saving irrigation (7.5)	Partial life saving irrigation (5)	Fully covered (0)
3	Degree of soil erosion	10	Severe (10)	Medium (7.5)	Low (5)	No erosion (0)
4	Water holding capacity	10	Very poor (10)	Poor (7.5)	Good (5)	Very Good (0)
5	Area under rainfed agriculture	15	More than 90% (15)	80 to 90 % (10)	70 to 80 % (5)	Below 70% (Reject) (0)
6	Status of field bund/contour bund / graded bund	10	Below 20 % (10)	50 to 20 % (7.5)	80 to 50 (5)	Above 80% (2.5)
7	Presence of hard rock below the land	15	Hard rock starts from 5 to 20 feet (15)	Hard rock starts from 21 to 50 feet (10)	Hard rock starts from 51 to 100 feet (5)	Deep soil depth (0)
8	Options for livelihood	10	Very poor (10)	Poor (7.5)	Good (5)	Very Good (0)
9	% of small and marginal farmers	10	More than 80% (10)	50 to 80 % (5)	Less than 50% (3)	
10	Degraded land	15	High above 50% (15)	Medium 25 to 50% (10)	Low less than 10 – 25 % (5)	Very low Less than 10% (0)

11	Ground water status	10	Very poor (10)	Poor (7.5)	Good (5)	Very Good (0)
12	Status of Technical Knowledge for improved farming systems	10	Very poor (10)	Poor (7.5)	Good (5)	Very Good (0)
13	Weather condition	15	Uncertain weather condition / Continuous drought for three years (15)	Drought comes one in five years (10)	Drought comes one in ten years (5)	Normal weather condition (0)
14	Poverty index (% of poor population)	10	Above 80% (10)	80 to 50 (7.5)	50 to 20 % (5)	Below 20 % (2.5)
15	Virginity (No treatment /intervention in last five years)	10	Above 80% (10)	80 to 50 (7.5)	50 to 20 % (5)	Below 20 % (2.5)
16	Productivity potential of land	15	Lands with low production & where productivity can be significantly enhanced with reasonable efforts (15)	Lands with moderate production & where productivity can be enhanced with reasonable efforts (10)	Lands with high production & where productivity can be marginally enhanced with reasonable efforts (5)	-
17	Organic carbon status	15	Very low (15)	Low (10)	Medium (5)	Normal (0)

Table 1.6: Weightage of the project

S. No.	Criteria	Weightage points
1	Drinking water	15
2	Irrigation	10
3	Degree of soil erosion	10
4	Water holding capacity	10
5	Area under rainfed agriculture	10
6	Status of field bund/contour bund / graded bund	10
7	Presence of hard rock below the land	10
8	Options for livelihood	10
9	% of small and marginal farmers	10
10	Degraded land	15
11	Ground water status	10
12	Status of Technical Knowledge for improved farming systems	10
13	Weather condition	15
14	Poverty index (% of poor population)	10
15	Virginity	10
16	Productivity potential of land	10
17	Organic carbon status	15
	Total Weightage (Out of total 205)	190
	Weightage Percentage	92.68

1.4 Details of ongoing watershed programme

Presently, no watershed development programme is going on in the micro-watershed**.**

CHAPTER - 2

GENERAL DESCRIPTION OF PROJECT AREA

2.1 Location:

The micro-watersheds of IWMP-II is located in Pahari, Karwi and Manikpur block of Chitrakoot district. It is about 15 to 20 km. radius from Chitrakoot (Karwi). Location (lat/long), Gram Panchayat, villages and its geographical area for each micro-watershed are depicted in Table 2.1. Total area of the project is 6242.30 ha, out of which 5150.00 ha is treatable. The geographical area of micro-watershed varied in the range of 377.34 to 1023.89 ha.

Area and Landuse: Village wise detailed information on type of land is depicted in Table 2.2. The total culturable land of the project is 4925.97 ha, out of which 99.98 (1.904%) ha land is under assured irrigation mainly by means of open shallow dug wells. The cultivable rainfed, temporary and permanent wastelands are about 4825.99, 249.12 and 74.89 ha, respectively, under the total land of the project.

2.3 Physiography

The micro-watersheds of IWMP-II is situated at an elevation of some 98 to 252 m above mean sea level and has relief from 20 to 151 m. The watershed has a general slope of less than 1.75 per cent. General topography of the watershed is mild to gentle. Elevation range and relief are given in Table 2.3.

Table 2.3: Micro-watershed wise elevation range and relief

S.N.	Name of microwatershed	Minimum	Maximum	Relief

Slope: Spatial distribution of different slope classes was prepared using Arc GIS. Slope was divided into five classes' viz. 0-0.5, 0.5-1.0, 1-3, 3-5, and more than 5 per cent. Per cent areal extent of different slope classes in IWMP-II micro-watershed is shown in Table 2.4. The dominant slope category in the micro-watershed were 1-3 per cent (39%) followed by 3-5 per cent (28%).

Table 2.4: Areal extent of various slope classes in the micro-watershed of IWMP-II

2.4 Climate

The annual rainfall of the District Chitrakoot varies from 528 to 1261.50 mm, about 90% of which is received during South-West monsoon period. The major part of the rainfall is received during the month of July and August. The length of growing season in the district ranges between 90 to 150 days depending upon rainfall and temperature regimes. The winter rains are erratic, occasional, meager and uncertain. The total rainy days/year vary from 30-45 in the region with an average of 37. The distribution of rainfall is very erratic. Low rainfall and drought are common features. Long dry spells during rainy season are also experienced often, which adversely affect the crops. It has been observed that in a cycle of 5 years, 2 are normal, 2 drought years and 1 is excessive rainfall year (Tiwari *et al*. 1998).

The climate of Chitrakoot is characterized by a hot dry summer and cold winter and is marked for high variability of rainfall year to year. There are primarily four seasons: – Dry Summer season – from March to May i.e. before advent of monsoon, moist summer season – from June to September (Monsoon) transition period - in October and November, which is the post monsoon period, and winter season – from December to February The coldest months in the year are December and January. Average monthly rainfall and temperature

Source: Data site of Agro-meteorological Deptt.

The open pan evaporation varied in the range of 0.9 to 28 mm/day during the year with average of about 7 mm/day. Average relative humidity varied in the range of 25 to 98 per cent, however the range of wind speed is 0.9 to 16 kmph. The details of flood and drought in the project area are showed in Table 2.6.

			twice in 5 years however, the region experienced severe drought during 2004-2007 and 2009 & 2010 were deficit by about 17 to 20 per cent		-

CHAPTER – 3

BASELINE SURVEY AND PARTICIPATORY RURAL APPRAISAL

Participatory rural appraisal (PRA) is a tool to appraise the socio-economic conditions along with all kind of resources available in the watershed through the active participation of the villagers. There are several tools and techniques of PRA. The PRA of Bhoehari Mafi (2C1A3m2b), Ragauli (2C1A3m2e), Chhechhariha Khurd (2C1A3n2d), Budha Semarwar, (2C1A3n2c), Basila (2C1A3k2b), Bhaunri (2C1A3k2j), Bagrehi (2C1A3k2k), Buer (2C1A3n2j), Kothilhai (2C1A3n2e) and Rampur Tarauhan (2C1A3n2h) micro-watershed was conducted and described in the subsequent sections.

3.1. Social-Economic Analysis

It is apparent from the social profile that the micro-watershed is inhabited by different caste and class. About 23 per cent of the population is scheduled caste. Population details of the IWMP-II are depited in Table 3.1. In general 7 per cent population migrate from the project area due to drought and earn more money, however, migration was more than 50 per cent during 2007-08 due to continuous drought from 2004 to 2007 in the region. Majority of population migrate to New Delhi, Haryana and Punjab during drought.The scenario of migration and infrastructure available and common properties resources available in the project is depicted in Table 3.2, 3.3 and 3.4, respectively.

Table 3.3 Details of Infrastructure available in the Project

S.N.	Name of Micro Watershed	Parameters		Status			
1	Bhoehari Mafi	(i)	Name of villages connected to the main road by an all-weather road	Karwi Rajapur road to Nandi from Chakzafer Mafi			
		(ii)	Village's Name provided with electricity	Bhoehari mafi, Etaura, Kota			
		(iii)	No. of households without access to drinking water	88 Against 420			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 02	(S) -	(HS) -	(VI) -
		(v)	Names of villages with access to Primary Health Centre	N.A			
		(vi)	Names of villages with access to Veterinary Dispensary	N.A			
		(vii)	Names of villages with access to Post Office	N.A			
		(viii)	Names of villages with access to Banks	N.A			
		(ix)	Names of villages with access to Markets/ mandis	N.A			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	N.A			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) -	(O) 16
		(xiii)	Name of villages with access to Anganwadi Centre	Bhoehari mafi, Etaura, Kota			
		(xiv)	Cummunity centre, Panchayat Ghar	Available			

S.N.	Name of Micro Watershed	Parameters		Status			
2	Ragauli	(i)	Name of villages connected to the main road by an all-weather road	Karwi to Rajapur road via Ganiwa form			
		(ii)	Village's Name provided with electricity	Ragauli, Kanthipur, Amarpur, Kota, Balapur Khalsa, Kaloopur			
		(iii)	No. of households without access to drinking water	101 Against520			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 04	(S) 02	(HS) -	(VI) -
		(v)	Names of villages with access to Primary Health Centre	N.A			
		(vi)	Names of villages with access to Veterinary Dispensary	N.A			
		(vii)	Names of villages with access to Post Office	01			
		(viii)	Names of villages with access to Banks	N.A			
		(ix)	Names of villages with access to Markets/ mandis	N.A			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	NIL			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) -	(O) 14
		(xiii)	Name of villages with access to Anganwadi Centre	Ragauli,Kanthipur,Balapur Khalsa			
		(xiv)	Cummunity centre, Panchayat Ghar	Available			

S.N.	Name of Micro Watershed	Parameters		Status			
3	Chhechhariha Khurd	(i)	Name of villages connected to the main road by an all-weather road	Karwi to Rajapur road via Ganiwa form			
		(ii)	Village's Name provided with electricity	Chhechhariha khurd, Chhechhariha Bujurg, Bhudha Mafi, Ragauli, Kanthipur, Kothilhai, Bhaunri			
		(iii)	No. of households without access to drinking water	175 Against840			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 03	(S) 01	(HS) 02	(VI) -
		(v)	Names of villages with access to Primary Health Centre	N.A			
		(vi)	Names of villages with access to Veterinary Dispensary	01			
		(vii)	Names of villages with access to Post Office	01			
		(viii)	Names of villages with access to Banks	01			
		(ix)	Names of villages with access to Markets/ mandis	Available			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	NIL			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) 01	(O) 12
		(xiii)	Name of villages with access to Anganwadi Centre	Chhechhariha khurd, Ragauli, Bhaunri			
		(xiv)	Cummunity centre, Panchayat Ghar	Available			

S.N.	Name of Micro Watershed	Parameters		Status			
4	Budha	(i)	Name of villages connected to the main road by an all-weather road	Karwi to Rajapur road via Ganiwa form			
		(ii)	Village's Name provided with electricity	Busha, Semarwar, Chhechhariha khurd, Bhabha mafi, Atrauli, Basila, Ragauli			
		(iii)	No. of households without access to drinking water	93 Against476			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 5	(S) 02	(HS) 01	(VI) -
		(v)	Names of villages with access to Primary Health Centre	N.A			
		(vi)	Names of villages with access to Veterinary Dispensary	N.A			
		(vii)	Names of villages with access to Post Office				
		(viii)	Names of villages with access to Banks	N.A			
		(ix)	Names of villages with access to Markets/ mandis	Available			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	NIL			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) -	(O) 08
		(xiii)	Name of villages with access to Anganwadi Centre	Chhechhariha khurd, Ragauli			
		(xiv)	Cummunity centre, Panchayat Ghar	Available			

S.N.	Name of Micro Watershed	Parameters		Status			
5	Basila	(i)	Name of villages connected to the main road by an all-weather road	Karwi toAllahabad road Basila, Bhaunri			
		(ii)	Village's Name provided with electricity	Basila, Bhaunri			
		(iii)	No. of households without access to drinking water	131 Against595			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 03	(S) 02	(HS) 01	(VI) -
		(v)	Names of villages with access to Primary Health Centre	N.A			
		(vi)	Names of villages with access to Veterinary Dispensary	01			
		(vii)	Names of villages with access to Post Office	01			
		(viii)	Names of villages with access to Banks	01			
		(ix)	Names of villages with access to Markets/ mandis	Available			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	NIL			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) 01	(O) 15
		(xiii)	Name of villages with access to Anganwadi Centre	Basila, Bhaunri			
		(xiv)	Cummunity centre, Panchayat Ghar	Available			

S.N.	Name of Micro Watershed	Parameters		Status			
6	Bhaunri	(i)	Name of villages connected to the main road by an all-weather road	Karwi toAllahabad road Bhaunri			
		(ii)	Village's Name provided with electricity	Bhaunri			
		(iii)	No. of households without access to drinking water	104 Against 515			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 01	(S) 01	(HS) 01	(VI) -
		(v)	Names of villages with access to Primary Health Centre	01			
		(vi)	Names of villages with access to Veterinary Dispensary	01			
		(vii)	Names of villages with access to Post Office	01			
		(viii)	Names of villages with access to Banks	Bhaunri			
		(ix)	Names of villages with access to Markets/ mandis	Available			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	NIL			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) 01	(O) 6
		(xiii)	Name of villages with access to Anganwadi Centre	Bhaunri			
		(xiv)	Cummunity centre, Panchayat Ghar	Available			

S.N.	Name of Micro Watershed	Parameters		Status			
7	Bagrehi	(i)	Name of villages connected to the main road by an all-weather road	Karwi toAllahabad road Bagrehi, Bhaunri			
		(ii)	Village's Name provided with electricity	Bagrehi, Bhaunri			
		(iii)	No. of households without access to drinking water	150 Against 665			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 02	(S) 01	(HS) 01	(VI) -
		(v)	Names of villages with access to Primary Health Centre	01			
		(vi)	Names of villages with access to Veterinary Dispensary	01			
		(vii)	Names of villages with access to Post Office	01			
		(viii)	Names of villages with access to Banks	Available			
		(ix)	Names of villages with access to Markets/ mandis	Available			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	NIL			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) 01	(O) 7
		(xiii)	Name of villages with access to Anganwadi Centre	Bagrehi, Bhaunri			
		(xiv)	Cummunity centre, Panchayat Ghar	Available			

S.N.	Name of Micro Watershed	Parameters		Status			
8	Buer	(i)	Name of villages connected to the main road by an all-weather road	Karwi to Allahabad road Buer, Bhaunri			
		(ii)	Village's Name provided with electricity	Buer, Bhaunri			
		(iii)	No. of households without access to drinking water	74 Against 350			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 04	(S) 03	(HS) 01	(VI) -
		(v)	Names of villages with access to Primary Health Centre	Available-1			
		(vi)	Names of villages with access to Veterinary Dispensary	Available-1			
		(vii)	Names of villages with access to Post Office	Available-1			
		(viii)	Names of villages with access to Banks	Available-1			
		(ix)	Names of villages with access to Markets/ mandis	Available-1			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	NIL			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) 01	(O) 08
		(xiii)	Name of villages with access to Anganwadi Centre	Buer, Bhaunri-3			
		(xiv)	Cummunity centre, Panchayat Ghar	Available-2			

S.N.	Name of Micro Watershed	Parameters		Status			
9	Kothilhai	(i)	Name of villages connected to the main road by an all-weather road	Karwi to Allahabad road			
		(ii)	Village's Name provided with electricity	Kothilhai, Buer Baghauda, Samariya Charandasi			
		(iii)	No. of households without access to drinking water	156 Against 680			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 05	(S) 03	(HS) +	(VI) -
		(v)	Names of villages with access to Primary Health Centre	N.A			
		(vi)	Names of villages with access to Veterinary Dispensary	N.A			
		(vii)	Names of villages with access to Post Office	N.A			
		(viii)	Names of villages with access to Banks	N.A			
		(ix)	Names of villages with access to Markets/ mandis	Available-1			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	NIL			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) 01	(O) 11
		(xiii)	Name of villages with access to Anganwadi Centre	Kothilhai, Buer, Baghauda, Samariya Charandasi-4			
		(xiv)	Cummunity centre, Panchayat Ghar	Available-4			

.N.	Name of Micro Watershed	Parameters		Status			
10	Rampur Tarauhan	(i)	Name of villages connected to the main road by an all-weather road	Karwi to Manikpur road All Electrified			
		(ii)	Village's Name provided with electricity	Rampur Tarauhan, Takhtupur, Pahkanjari, Bhaunri, Buer, Char, Basawanpur, Semariya Charan Dasi			
		(iii)	No. of households without access to drinking water	145 Against 610			
		(iv)	No. of educational institutions : Primary(P)/ Secondary(S)/ Higher Secondary(HS)/ vocational institution(VI)	(P) 05	(S) 03	(HS) +	(VI) -
		(v)	Names of villages with access to Primary Health Centre	N.A			
		(vi)	Names of villages with access to Veterinary Dispensary	N.A			
		(vii)	Names of villages with access to Post Office	N.A			
		(viii)	Names of villages with access to Banks	N.A			
		(ix)	Names of villages with access to Markets/ mandis	Available-1			
		(x)	Names of villages with access to Agro-industries	N.A			
		(xi)	Total quantity of surplus milk deficit	NIL			
		(xii)	No. of milk collection centres (e.g. Union(U)/ Society(S)/ Private agency(PA)/ others (O))	(U) -	(S) -	(PA) 01	(O) 12
		(xiii)	Name of villages with access to Anganwadi Centre	Rampur Tarauhan, Takhtupur, Pahkanjari, Bhaunri, Buer, Char, Basawanpur, Semariya Charan Dasi			
		(xiv)	Cummunity centre, Panchayat Ghar	Available-4

3.2 Soil and Land Holding Pattern

Majority of the land of the project is heavy textured soil. Category wise details of farmer and their irrigated area are described in Table 3.6.

Table 3.5: Details of Soil texture in IWMP-II Chitrakoot

S. N.	MWS project	Area in different soil group (ha)			
		Light textured soil (sand, loamy sand)	Medium textured soil (Sandy loam, silt loam)	Heavy textured soil (Clayey)	MWS Total
1	Bhoehari mafi 2C1A3m2b	11.70	70.10	387.20	469

3.3 Major Crops, its Productivity and Production

Micro-watershed wise grown crops, their productivity and production under irrigated and rainfed condition is given in Table 3.7. As far as productivity of cereals is concerned, it is significantly lower than the state and national average. Micro-watershed wise cropping intensity varied from 132.63 to 142.57 per cent with 136.86 per cent for the project.

Table 3.7: Micro-watershed wise details of Crops, their Productivity and Production in IWMP-II Chitrakoot

3.4 Agroforestry and Horticulture

There is no systematic agroforestry and orchard in the project area, however, few scattered trees of desi ber, aonla, guava, kathal, etc. was found in the micro-watershed which is consumed locally (Table 3.7).

3.5 Livestock and Fisheries

In the name of cattle mainly desi cow are found in the project which productivity are significantly lower than the average productivity of the state. The Details of livestock and its productivity are available in Table 3.8 and 3.9, respectively.

Table 3.9: Livestock Population in IWMP- I, Chitrakoot (All Figures are in No.)

3.7 Livelihood Status

Assestless/landless people earn their livelihood mainly from labour and *batai.* They were earning about Rs. 3000/per month. It is expected that their income will enhance due to watershed management as it will generate sustained employment opportunity. Intervention based on piggeries, fisheries, black smithy and carpentery was not in practice. Livelihood status of landless, farmers and interventions based livelihood status are shown in Table 3.11, 3.12 and 3.13, respectively.

Table 3.12: Livelihood Status of Landless People

3.8 Hydrology, Water resources and Soil and moisture Conservation

Open shallow dug wells are the only means of irrigation in the area and these wells support only for life saving irrigation. In general, irrigation interval is low due to low water holding capacity of the soils. In the name of soil and moisture conservation only field bund Use of micro-irrigation is almost nil in the area. Groundwater status, irrigation status and source are given in Table 3.15, 3.16 and 3.17, respectively.

CHAPTER – 4

INSTITUTIONAL BUILDING AND PROJECT MANAGEMENT

4.1 Project Implementing Agency

The Project Implementing Agency (PIA) is Soil Conservation Officer, Department of Land Development and Water Resources, IWMP-II Chitrakoot-II, Chitrakoot, Uttar Pradesh. The PIA was given responsibility to develop the micro-watershed by District Watershed Development Unit (DWDU) and State Level Nodal Agency (SLNA) considering its vast experiences in handling land and water management issues in the region. The PIA has well experienced trained and sufficient staff to handle the watershed management programme efficiently. Most of the staff of PIA has exposure of several watershed projects. In addition the PIA has access for technical backstopping from the ICAR viz. IGFRI and NRCAF, and KVK located at Jhansi,Banda and Chitrakoot. Details of PIA are presented in subsequent section.

4.3 Convergence in IWMP-II Chitrakoot

Several programmes are running in the area which are sponsored by Central and State Govt. and could be converged with watershed programmes. Some of them are listed in Table 4.9. The details of the activities to be carried out under convergence in the project are mentioned in Chapter 5. However, micro-watershed wise amount of convergence is mentioned in Table 4.10.

Table 4.9: List of Central/State sponsored schemes

S.No.	Name of Programme	Implementing Agency	Objectives of the Programme
1	Seed Distribution Programme (Pulse Development & ISOPAM)	U.P. Agriculture Deptt.	To increase seed replacement ratio for higher productivity
2	Training Programme	Agriculture Deptt., KVK	Capacity building of the farmers
3	National Horticulture Mission (NHM)	Horticulture Deptt.	Increasing the area under fruits and vegetables
4	MGNERGA (Bunding, Farm Pond, Adarsh Jalashay, Blast well, Chakroad, etc.)	Gram Panchayat	To provide work to the all village personnel under the rojgar guarantee yojana

Table 4.10: Details of Convergence of IWMP with other Schemes in IWMP-II Chitrakoot (Rs. In Lakh)

CHAPTER - 5

MANAGEMENT/ACTION PLAN

The details of Preparatory Phase, Works Phase and Convergence planning are described in subsequent section

5.1 Entry Point Activities (EPA)

Entry point activities were executed with the consent of stake holders and it helped in winning the confidence of the villagers for moving ahead the other programmes of watershed. In total 10 EPA activities were executed in the project area which costed Rs. 2472000.00. Photographs of entry point activities done in the project are given below:

Name of PIA	Name of Project	Year	Name of Block	Name of project/ Name of village	Code of project	E.P.A cost in lakh		Cost in lakh	
2	3	4	5	6	7	8	9	10	11

5.2 Works Phase

Following are the major problems of the watersheds

- Water scarcity both for drinking as well as irrigation
    - Excess runoff and soil loss
- Low water holding capacity of the soil
- Low productivity of crops
    - Low fertility of soil
    - Low cropping intensity
    - Lack of technical knowledge
    - *Anna Pratha* (let loose system of cattle)
    - Poor vegetative cover
    - Poor/low productive breeds of miltch animals
    - Lack of feed & fodder availability
    - Non availability of wood/fuel
    - Lack of proper market facilities
    - Low income of the households
    - Lack of employment opportunity.

Estimation of Runoff from the Watershed

Runoff from the watershed is estimated by Curve Number method of the Soil Conservation Service of the USDA using 18 years data (1990-2009) with a gap of 2005 and 2006). It is estimated that runoff potential of the project area is 333.40 mm, equivalent to 62 per cent of average annual rainfall. Expected runoff and soil loss from the project area are depicted Table 5.1.

Table 5.1: Runoff and soil erosion in the project area (IWMP-II Chitrakoot)

Watershed Development Activities Proposed

The details of the activities of watershed works (natural resource conservation) are marked on individual field in the micro-watershed wise proposed plan (Map Section). Individual beneficiary wise estimate has been prepared for each village comes under each micro-watershed. Information of individual beneficiaries is kept in respective project file available with PIA. Beneficiary wise information was summerised and prepared for each micro-watershed and gram panchayat wise (Table 5.2 and 5.3). Similar exercise was also done for participatory crop trials. Location of these trials is marked on proposed plan of participatory crop demonstration (available in map section).

CHAPTER - 6

CAPACITY BUILDING PLAN

The capacity building of various stake holders will be given very high priority as the watershed is to be developed in participatory mode. Capacity building initiative plays very important role in human resource development of model watershed to replicate and train other watershed resource persons. The capacity building initiatives include training to government officials, CBOs, farmers and PIAs through field days, hands-on trainings, exposure visits to successful watersheds, training materials and etc. Need-based specialized training courses will be conducted. The details of the training institutes for capacity building and training to stake holders on participatory watershed management are summarized in Table 6.1 and 6.2, respectively.

Table 6.1: List of identified training institutes for capacity building

Sr. No.	Name of the Training Institute	Full Address with contact no, website & e-mail	Designation of the Head of Institute	Type of Institute	Area(s) of specialization	No. of training assigned	No. of persons to be trained	Allocation to be made to the institute

Table 6.2: Training to stakeholders on participatory watershed management

Sl. No.	Client Group	Title of the Programme/Duration/ Time	Objectives	Coverage/Topics	Training Methodology	Training Institutions
1.	Watershed Committee & WDT members	Planning and implementation of IWMP Project (3 day)	To Strengthen WC and WDT for planning and executing the Project	Natural Resource Management Livelihood options for landless and marginal farmers. Improved Agriculture production system	Lectures, videos and visits to successful watershed	National Research Center for Agro-forestry, Gwalior Road,
2.	User Group, SHGs members	Agriculture Production system and specialized training for SHGs (3 day)	To increase the Agriculture productivity and livelihood improvement	Integrated crop management in pulses, cereals, oilseeds, vegetables, orchards and small scale projects related to Agriculture.	Lectures, videos and visits	Krishi Vigyan Kendra, Bharari,
3	Watershed Committee & WDT members	Management of natural resources on watershed basis and agroforestry	Awareness and strengthening of knowledge and skills	NRM, Production system and livelihood	Lectures, videos and visits to successful watershed	National Research Center for Agro-forestry, Gwalior Road,

4	Secretaries of WC and WDT/PIA members	Book keeping and record maintenance	Maintenance of record and preparing budget	Cash book and ledger registers, preparing budget, maintenance of accounts	Lectures and practical exercise	National Research Center for Agro-forestry, Gwalior Road,
5	PIA/WDT members	Cultivation of fodder in watershed	Awareness and knowledge enhancement	Package of practices of fodder cultivation	Lectures, videos and visits to successful watershed	Indian Grassland and Fodder Research Institute,
6.	PIA/WDT/WC members	Knowledge of market and pricing	Awareness and knowledge enhancement	Market intelligence	Lectures, videos and visits	Agriculture Technology Management Agency (ATMA)
7	PIA/WDT members	Design of SWC structures	Strengthening of knowledge	SWC structures	Lectures, practical exercise and visits to successful watershed	NRCAF, / CSWCRTI&RS, Datia, MP

CHAPTER - 7

PHASING OF PROGRAMME AND BUDGETING

7.1 Monitoring and Evaluation

Monitoring of the project will be done at each stage and it will be carried out for both, process and outcome. Some community members will be trained and will be involved in participatory monitoring of various parameters and processes and the crop yields. The interventions, expenditure and other information will be displayed in the micro-watershed through wall writings. Besides trained community members, PIA/DWDU will also monitor the physical and financial progress of watershed development programme. Frontier technologies viz. GIS and Remote Sensing techniques will be used by the PIA/DWDU for monitoring and evaluation. The PIA shall submit quarterly progress reports (countersigned by the Watershed Committee (WC) President) to the DWDU for further submission to the SLNA. Sustainable and unbiased monitoring will be ensured by involving an independent agency. About 1 per cent of the total budget will be used on this activity.

Plan for Evaluation

Watershed development activities bring about both tangible and intangible benefits. In order to quantify the benefits, impact analysis has been proposed.

Theme

It is presumed that as a consequence of watershed development activities there will be noticeable change in socio-economic status of inhabitants, cropping intensity, ground water recharge, crop diversification, fuel, fodder and small timber availability, livestock composition and milk production, etc. These indicators can be gauged over bench mark data both at the beginning and at the end of the project within the watershed.

Observations

The following indicators will be taken into account for quantitative and qualitative assessment. For the purpose, detailed questionnaires will be prepared and field observations will be carried out.

- Duration of availability of drinking water/irrigation and groundwater recharge
- Irrigation frequency and area under irrigation
- Changes in cropping pattern and cropping systems in the farmers fields along with productivity and incomes
- Soil health
- Satellite monitoring for vegetation cover and other parameters
- Fuel, fodder and small timber availability

- Livestock composition and productivity
- Periodic pest and disease monitoring will be done in major crops
- Socio-economic aspects including resource inventory
- Following indices will also be worked out as qualitative indicators of the watershed development:
- Land Improvement Index (LII)
- Crop Diversification Index (CDI)
- Cultivated Land Utilization Index (CLUI)
- Crop Fertilization Index (CFI)
- Induced Watershed Eco-Index (IWEI)

The concurrent and post-project monitoring and evaluation would be conducted to assess the status of watershed related interventions. It will be done by an independent agency having similar experiences. About 1 per cent of the total budget will also be used on evaluation.

CHAPTER - 8

CONSOLIDATION AND WITHDRAWL STRATEGY

8. Consolidation and Withdrawl Strategy

Success of any program depends on sustainability of the various watershed interventions and sustainability can only be achieved through active participation of community. Active participation and cooperation of community can be ensured by building their capacities through exposures and trainings. From the beginning emphasis will be on capacity building and empowerment of stakeholders. The Watershed Committee, SHGs, Area Groups, Users Group and other CBOs will be established, trained, and strengthened to continue development after Withdrawl of PIA. By building economic activities through CBOs community participation will be sustained. The PR&D approach along with demand driven interventions will reduce dependency on subsidies. Contributions from the community will be ensured for the entire activities to develop sense of belongingness and these contributions will be deposited to the account of Watershed Development Fund. Watershed Development Fund will also be strengthening through donations from the individual and institutions and the CBOs will be trained to run watershed as business model on sustainable basis. The tangible economic benefits along with empowerment and hand holding by PIA will empower the CBOs to develop and sustain the watershed activities after Withdrawl of the PIA. Community organizations will withdraw the money from the WDF to maintain the asset created during the implementation phase. The consolidation phase will also include writing of project completion report, documentation of success stories, making films, leaflets, bulletins and the lessons learnt. The expenditure will be done as per the Common Guidelines for Watershed Development Projects 2008.

CHAPTER - 9

EXPECTED PROJECT OUTCOME

9.1 Employment Generation and Checking Migration

There had been migration from district Chitrakoot during drought years; it is as high as 22% against an average migration rate of 7.60%, in other regions of Uttar Pradesh towards northern part of the country, specially the states of Delhi, Punjab and Haryana, as agriculture labours, factory workers, rickshaw pullers etc. The major reason attributed to high rate of migration is continuous drought in the region and absence of any other alternate livelihood opportunity, in spite of several anti-poverty programmes.

Due to watershed management the cropping intensity will be increased by around 18.80 per cent, in turn acreage in agricultural activities will be increased by about 968 ha. Therefore, an additional employment of about 139906 man days will be generated annually. Therefore, no migration in search of livelihoods is expected after implementation of watershed programme.

9.2 Other Expected Outcome*

The following tangible benefits are expected after implementation of the project:

- Runoff will be reduced by about 30 per cent, however soil and nutrient loss may be reduced up to 40 per cent from the watershed.
- Irrigation intensity may be increased to 40 per cent from present 3 per cent life saving irrigation.
- Surface water in nallah may be available for more than 8 months against 4-5 months at present.
- Average ground water recharge of about 4 m may be easily obtained after implementation of the programme
- Productivity of crops may be increased by about 25 per cent
- Significant saving of seeds may be obtained through crop demonstration with improved package of practices
- During implementation phase about 559624 mandays will be created through the soil and water conservation measures and crop/agroforestry interventions.
- The overall B C ratio of the project is estimated to be 2.24 as compared to the 1.55 in pre project scenario (detailed analysis is given in Chapter 7)

***Above mentioned outcomes are based on the meta analysis of 636 watershed projects throughout the country done by ICRISAT, Hyderabad and practical experience of watershed management in Bundelkhand region.**

9.3 Questions to be answered

This project will answer the following questions :

1. Will the measures taken for water harvesting sufficient enough to recharge the perched water table?
2. Will the soil and water conservation practices be helpful in combating drought?
3. Will alternate land use such as agroforestry land use system result in self reliance/prosperity in drought prone areas?
4. Can the strategies based on watershed basis yield fruitful results?
5. Response of the villagers towards the project and their participation in sustaining developed resources after Withdrawl of the project?
6. Will the formation of SHGs will help in savings and generation of self employment?
7. Will the watershed programmes improve the socio-economic conditions of the stake holders?
8. Will the watershed programme helps in capacity building of the stake holders for dissemination of various activities of watershed programme?
9. Will it sustain after project Withdrawl?

9.4 Problems that could be solved as a results of this project/study

Following problems can be tackled in the proposed watershed :

1. Solving the problems of shortage of fuel, fodder, fruit and small timber requirement of villagers.
2. Creating water resources for ground water recharge availability of surface water for animal drinking and nistar purposes.
3. Increasing fertilizer consumption and improving NPK consumption ratio.
4. Optimizing crop productivity by putting more area under HYV and irrigation.
5. Increasing cropping intensity.
6. Promoting dairying through increased fodder availability.
7. Improving basic amenities and facilities like health, education, drinking water etc.
8. Increasing per capita income and thereby standard of living of farming community.
9. Increasing co-operative membership.
10. Increasing self employment.
11. Improving living standard of society.
