& Water Resources, Pratapgarh**

## CERTIFICATE

This is to be certified that the proposed Project (IWMP-II) comprising three micro-watersheds of district Pratapgarh, Uttar Pradesh has been selected for its sustainable development on watershed basis under Integrated Watershed Management Programme. This project has been approved by WCDC, WC & Gram Panchayat .The land is physically available for proposed interventions and is not overlapping with any other schemes. It will be developed as per Common Guidelines for Watershed Development Project-2008, GOI, New Delhi. The significant results will be achieved through proposed interventions on soil and water conservation, ground water recharge, availability of drinking and irrigation water, agricultural production systems, live stock, fodder availability, livelihoods of asset less, capacity building, etc. The proposed **Detailed Project Report of IWMP-II, 2010-11** is submitted for its approval & implementation.

**Soil Conservation Officer**

IWMP-II

## EXECUTIVE SUMMARY

The Government of India takes integrated watershed management Programme (IWMP) as a key strategy for improving productivity and livelihoods in the rain-fed and drought-prone regions. Watershed is an organic unit in the natural and ecological systems. It is an aggregation of numerous natural resources. The exploitation and utilization of watershed should be a comprehensive development process of all resources that follows the principle of integrated management and allocation. It is the essential condition to guarantee the environmental protection and sustainable development in watershed areas.

The main objectives of the IWMP are to restore the ecological balance by harnessing, conserving and developing degraded natural resources such as soil, vegetative cover and water. The outcomes are prevention of soil run-off, regeneration of natural vegetation, rain water harvesting and recharging of the ground water table. This enables multi-cropping and the introduction of diverse agro-based activities, which help to provide sustainable livelihoods to the people residing in the watershed area.

IWMP – II, 2010-11 project is located in the **Sangipur Block** of Pratapgarh District in the state of Uttar Pradesh. The project area is situated from  $26^{\circ}4'4.383''$  Latitude North to  $36^{\circ}1'17.985''$  North and  $81^{\circ}31'1.676''$  Longitude East to  $81^{\circ}36'29.737''$  East. The average rainfall of the project area is 775.90 mm and the average temperature ranges from  $6.5^{\circ}\text{C}$  to  $43.70^{\circ}\text{C}$ .

The project is a **cluster** of 03 Micro watersheds. The total project (geographical) area of the micro watershed cluster is about 2851 ha out of this 2176 ha has been undertaken to be treated under **Integrated Watershed Management Program** (IWMP-II) with starting year 2010-11.

This project proposes to generate of both wage employment and self employment opportunities. Wage employment would be created by engaging people in watershed physical works like construction of earthen bunds, farm bunds, village pond, plantation, etc. Self employment would be created by providing the people with cash support in the form of direct livelihood activities like agriculture, animal husbandry and enterprise development. This will also help in checking of migration.

It is also expected that after the implementation of the proposed activities during IWMP-II, there would be a conspicuous increase in the gross cultivated area, cropping intensity, food production, fodder production, fuel production, average income from agriculture, milk production, irrigated area, area under agro-forestry etc. An increase in overall value of land and a decrease of depth of ground water is expected. A significant amount of employment generation and women benefitting from SHG's is also expected.

The proposed watershed area has been identified by the state department under IWMP project by proper prioritization of different parameters for watershed selection criteria. The SLNA has nominated Bhoomi Sanrakshan Adhikari, Sharda Shahayak command, Pratapgarh P.I.A for the aforesaid project. The area of watershed is proposed to be taken by Bhoomi Sanrakshan Adhikari, Department of land development & water resources, Pratapgarh, for integrated watershed management programme (IWMP-II) starting from the year 2010-11. The project will be completed by 2013-14.

## CHAPTER-1

### INTRODUCTION AND PROJECT BACKGROUND

#### **1.1: Project Background:**

IWMP-2<sup>nd</sup> project is located in part of **Sangipur Block of Pratapgarh District, U.P.** The project is a **cluster** of 03 Micro watersheds. The total project (geographical) area of the micro watershed cluster is about 2851 ha out of this 2176 ha has been undertaken to be treated under **Integrated Watershed Management Program (IWMP-2<sup>nd</sup>)** with starting year 2010-11.

**Table 1.1: Basic Project Information:**

S. No.	Details	No.	Area (ha.)
1	2	3	4
1	Total Geographical area and watersheds in the District	255	273528
2	Workable Micro Watersheds and Geographical area	165	177106
3	Micro Watersheds already treated by LDWR & other agencies	90	96422
4	Balance Micro Watersheds/ Geographical area for treatment (Before IWMP -2 <sup>nd</sup> )	151	165237

**Table 1.2: Approved plan Preliminary Project Report (PPR) by Steering Committee (SC), Govt. of India:**

Year	Project/Phase IWMP	MWS	Geographical Area/Treatable (ha)	Project Cost Rs. lacs	PIA	S.C. Meeting Date
1	2	3	4	5	6	7
2010-11	IWMP-2 <sup>nd</sup>	03	2851/2176	261.12	B.S.A, Pratapgarh	19-10-2010

**Table 1.3: Details of Micro Watersheds:**

S.No.	Code of Micro watersheds	Name of Micro Watersheds	Treatable Area (ha)	Name of River / Nalah in each MWS
1	2B2G1h2a	Mustfabad	581	Sai River
2	2B2G1h1e	Rahtikar	1290	Sai River
3	2B2G1h2b	Ramnagar col	305	Sai River
		<b>TOTAL</b>	<b>2176</b>	

## **1.2: Need and scope for Watershed development programme:**

Watershed Development Programme is prioritized on the basis of thirteen parameters namely Poverty index, Percentage of SC/ST population, Actual wages, Percentage of small and marginal farmers, Ground water status, Moisture Index, Area under rainfed agriculture, Drinking water situation, Percentage of the degraded land, Productivity potential of the land, Continuity of another watershed that has already been treated, and Cluster approach for the area.

Cluster approach was followed taken into consideration for 03 micro-watersheds covering a total geographical area of 2851 ha with a cumulative score of 80.50 (Reference Table given below)-

### **1.4: Weightage for the selection of the watershed:**

Project name	Weightage													
	i	ii	iii	iv	v	vi	vii	viii	ix	x	xi	xii	xiii	Total
IWMP-2 <sup>nd</sup>	5	5	5	10	3	0	15	7.5	10	10	5	5	0	80.50

### **Weigthage Criteria (for score):**

S.No.	Criteria	Maximum Score	Ranges & Scores			
i	Poverty index (% of poor to population)	10	Above 80 % (10)	80 to 50 % (7.5)	50 to 20 % (5)	Below 20 % (2.5)
ii	% of SC/ ST population	10	More than 40 % (10)	20 to 40 % (5)	Less than 20 % (3)	
iii	Actual wages	5	Actual wages are significantly lower than minimum wages (5)	Actual wages are equal to or higher than minimum wages (0)		
iv	% of small and marginal farmers	10	More than 80 % (10)	50 to 80 % (5)	Less than 50 % (3)	
v	Ground water status	5	Over exploited (5)	Critical (3)	Sub critical (2)	Safe (0)
vi	Moisture index/ DPAP/ DDP Block	15	-66.7 & below (15) DDP Block	-33.3 to -66.6 (10) DPAP Block	0 to -33.2 (0) Non DPAP/ DDP Block	

S.No.	Criteria	Maximum Score	Ranges & Scores			
vii	Area under rain-fed agriculture	15	More than 90 % (15)	80 to 90 % (10)	70 to 80% (5)	Above 70 % (Reject)
viii	Drinking water	10	No source (10)	Problematic village (7.5)	Partially covered (5)	Fully covered (0)
ix	Degraded land	15	High – above 20 % (15)	Medium – 10 to 20 % (10)	Low- less than 10 % of TGA (5)	
x	Productivity potential of the land	15	Lands with low production & where productivity can be significantly enhanced with reasonable efforts (15)	Lands with moderate production & where productivity can be enhanced with reasonable efforts (10)	Lands with high production & where productivity can be marginally enhanced with reasonable efforts (5)	
xi	Contiguity to another watershed that has already been developed/ treated	10	Contiguous to previously treated watershed & contiguity within the micro watersheds in the project (10)	Contiguity within the micro watersheds in the project but non contiguous to previously treated watershed (5)	Neither contiguous to previously treated watershed nor contiguity within the micro watersheds in the project (0)	
xii	Cluster approach in the plains (more than one contiguous micro-watersheds in the project)	15	Above 6 micro-watersheds in cluster (15)	4 to 6 micro watersheds in cluster (10)	2 to 4 micro watersheds in cluster (5)	
xiii	Cluster approach in the hills (more than one contiguous micro-watersheds in the project)	15	Above 5 micro-watersheds in cluster (15)	3 to 5 micro watersheds in cluster (10)	2 to 3 micro watersheds in cluster (5)	
	<b>Total</b>	<b>150</b>	<b>150</b>	<b>90</b>	<b>41</b>	<b>2.5</b>

#### **1.4: Details of ongoing watershed programme:**

Presently, watershed development programme under IWMP is going on in the District.

## CHAPTER-2

### GENERAL DESCRIPTION OF PROJECT AREA

#### **2.1: Location:**

The selected watershed in the catchment area of Sai River in Pratapgarh district (U.P.) and is located in North West part of the district. This Watershed cluster includes 13 villages of 09 Gram Panchayats. The livelihood of these people is primarily based on rainfed agriculture, animal husbandry, wage labour, goat, sheep and poultry.

## CHAPTER-3

### BASELINE SURVEY AND PARTICIPATORY RURAL APPRAISAL

#### **3.1: Social-Economic Analysis:**

IWMP-2<sup>nd</sup> watershed project has a total of 4031 households with a population of 20157 (as per base-line survey) out of which 10174 are male and 10083 female. The sex ratio is 991 female to 1000 male. There are 876 BPL families. The detail of population in each micro-watershed is given below:-

**Table 3.1: Demographic Features in Project Area**

S.No.	Code of MWS	Name of MWS	Name of GP	Village	Total population	Male	Female	(All figures in nos.)

### 3.2: Land Holding Pattern:

The average land holding is about 0.60 ha with lack of irrigation source, so it forces the majority of the farmers to migrate to ensure their livelihood. This affects the demographic profile of the watershed directly.

**Table 3.2: Details of land holding pattern**

## Migration:

People migrate during summer season to different parts/cities of the country like Kanpur and Delhi as daily wages, agricultural and construction labourers. The details are given below:

Before the formation of SHGs, PRA activities & Group discussions (GDs) is organised with the help of women, which came up with the following observations:-

- a) Lack of proper credit facilities due to low intervention of formal financial credit institutions.
- b) Excessive exploitation of weaker section by money lenders and also Lack of attitude for saving among poor people.
- c) Lack of Knowledge on credit, thrift activity and banking.

With a detailed discussion identified training institutes, NGOs working in the area it was planned to provide capacity building to SHGs to promote livelihood activities with an aim to women empowerment also.

#### **4.4: Convergence in IWMP-2<sup>nd</sup> :**

Several programmes are running in the areas which are sponsored by State of U.P. & Central Govt of India. Some of them are given below-

**Table 4.7: List of State/Central Govt. Schemes**

S.No.	Name of Programme	Implementing Agency	Objectives
1	Training Programme	Ag. Department & KVK	Capacity building of the farmers
2	National Horticulture Mission	Horticulture Department	Increasing the area & Productivity of Products under fruits and vegetables
3	MNREGA	Gram Panchayat	To provide 100 days employment work to the villagers to avoid migration
4	Animal Husbandry	U.P. Animal Husbandry Dept.	To improve the productivity of animals.
5	NABARD	Ag. Deparment	Soil & Water conservation & Watershed Development

**Table 4.8: Details of Convergence of IWMP-2<sup>nd</sup> with other Schemes**

S. No.	Code of MWS	Project Cost (Rs.)	Treatable Area (ha.)	Budget (Rs.)	Convergence Amt. (Rs.)	%age	Name of Schemes for Converging with IWMP-2 <sup>nd</sup>	Remarks
1	All 03MWS	177.635	2176	146.227	31.408	21.479	MNREGA	For Natural resource management (Soil & Water conservation Structures)

## CHAPTER-5

### MANAGEMENT ACTION PLAN

The details of Preparatory Phase, Work Phase and Convergence Planning are described in subsequent sections.

#### **5.1: Entry Point Activity (EPA):**

Entry point activities are executed with the consent of stake holders and it helps in winning the confidence of the villagers for moving ahead the other programmes of watershed.

**Table 5.1: Details of EPA**

S. No.	Block	Code of MWS	Name of MWS	Name of GP	No. of EPA		Name of EPA	Location/ Village	Cost
					Target	undertaken

		<b>TOTAL</b>			<b>34</b>	<b>34</b>			<b>10.44</b>

## **5.2 Work Phase:**

**Following are the major problems of the watershed:-**

- Moisture stress-Drought conditions
- Erosion hazard
- Excess runoff
- Land degradation
- Low fertility of soil
- Ground water depletion/Low ground water table, poor quality of groundwater
- Low cropping intensity
- Lack of technical knowledge
- Lack of irrigation facilities
- Low productivity of crops
- Poor availability of drinking water for human as well as animals
- Overgrazing
- Poor vegetative cover
- Poor/low productive breeds of miltch animals
- Lower milk production
- Lack of feed & fodder availability
- Non availability of wood/fuel
- Lack of proper market facilities
- Lack of educational, transportation, medical & health care facilities
- Low wages
- Small land holdings
- Low income of the households
- Lack of employment opportunity
- Migration from the project area

## **Watershed Development Activities Proposed:**

The details of the activities of watershed works are given in Table 5.3.

**Table 5.2: Micro Watershed wise details of Watershed Development Activities proposed in IWMP-2ND**

## CHAPTER-6

### CAPACITY BUILDING PLAN

The capacity building of various stake holders will be given very high priority as the watershed is to be developed in participatory mode. Capacity building initiative plays very important role in human resource development of watershed.

**Table 6.1: List of identified training institutes for capacity building**

Sl. No.	Name of Training institute	Address	Designation of the Head of institute	Type of Institute	Area(s) of specialization	No. of training assigned	No. of persons to be trained	Allocation to be made to the institute
1	2	3	4	5	6	7	8	9
1	SIRD	Bakshika Talab, Lucknow	Director General	State level	Orientation & Implimentation of Project	34	959	Bakshi ka Talab, Lucknow
2	N.D. Univ of Agri. & Tech.	Kumarganj, Faizabad	Vice Chancellor	State level				Kumarganj, Faizabad

## **CHAPTER-7**

### **PHASING OF PROGRAMME AND BUDGETING**

#### **7.1 Monitoring and Evaluation:**

Monitoring of the project will be done at each stage and dit will be carried out for both process and outcome. Some community members will be trained and will be involved in participatory monitoring of various parameters and processes and the crop yields. The intervention, expenditure and other information will be displayed in the micro watershed through wall writing, besides trained community members, PIA/WCDC will also monitor the physical and financial progress of watershed development programme. Frontier technologies viz. GIS and Remote Sensing techniques will be used by the PIA/WCDC for monitoring and evaluation. The PIA shall submit quarterly progress reports (countersigned by President of Watershed Committee (WC) to WCDC for further submission to the SLNA. About 1% of the total budget will be used on this activity.

#### **Plan for Evaluation**

Watershed development activities bring both tangible and intangible benefits. In order to quantity the benefits, impact analysis has been proposed.

#### **Theme**

It is presumed that as a consequence of watershed development acitivities there will be noticeable change in socio-economic status of inhabitants, cropping intensity, ground water recharge, crop diversification, fuel and small timber availability, livestock composition and milk production etc. These indicators can be gauged over bench mark data both at the beginning and at the end of the project with in the watershed.

#### **Observation**

The following indicators will be taken into account for quantative and qualative assessment. For the purpose, detailed questionnaires will be prepared and field observation will be carried out.

- Duration of availability of drinking water/irrigation and ground water recharge.
- Irrigation frequency and area under irrigation.
- Changes in cropping pattern and cropping system in the farmers fields alongwith productivity and incomes.
- Soil health.
- Satellite monitoring for vegetation cover and other parameters.
- Livestock composition and productivity.
- Periodic pest and disease monitoring will be done in major crops.
- Socio economic aspects including resource inventory.

## 7.2: Annual Action Plan (AAP)

Physical and financial targets and outlays and year wise breakups are given in Table 7.1.

## **CHAPTER-8**

### **CONSOLIDATION AND WITHDRAWAL STRATEGY**

Success of the programme depends on various watershed interventions and sustainability can only be achieved through active participation of community. It will be on capacity building and empowerment of stakeholders. The WC, SHGs, UGs etc. will be established, trained and strengthened to continue development after withdrawal of PIA. By building economic activities through CBOs community participation will be sustained. The PR&D approach alongwith demand driven interventions will reduce dependency on subsidies. Contribution from the community will be ensured for the entire activities to develop sense of belongingness and the contribution will be deposited to the account of watershed development fund (WDF). It will also be strengthening through donations from the individuals and institutions and the CBOs will be trained to run watershed as business model on sustainable basis. The tangible economic benefits alongwith empowerment by PIA will empower the CBOs to develop and sustain the watershed activities after withdrawal of the PIA. Community organization will withdraw the money from the WDF to maintain the assets created during the implementation phase.

#### **The consolidation phase will also include:-**

1. To prepare the project completion report.
2. Documentation of success stories.
3. Making films, leaflets, bulletins and the lessons learnt.
4. The expenditure will be done as per the common guidelines for watershed development projects.
5. The completion report will reflect the development on following aspects:-
  - a. Productivity enhancement.
  - b. Nutritional Security.
  - c. Risk minimization (Integrated farming system, water harvesting and protected cultivation, value addition and improved marketing).
  - d. Profitability.
  - e. Livelihood security (skill enhancement capacity building, increased employment in agriculture and allied enterprises, reduction in migration etc.).

## CHAPTER -9

### EXPECTED PROJECT OUTCOME

#### **9.1 Employment Generation and Checking Migration**

Employment has always been a problem in the village. The principal occupations of the people are dry land agriculture, animal husbandry and casual labor work. However, rain fall being very limited and erratic, agriculture suffers, i.e. at best they can take only a single crop, which keeps them partially engaged for about 4 months. Lack of fodder makes animal husbandry very difficult too. So, animal husbandry does not keep them engaged full time. Thus the people mainly depend upon casual labor, either in the village itself or outside it.

The project plans for creation of both wage employment and self employment opportunities. Wage employment would be created by engaging people in watershed physical works like construction of earthen bunds, farm bunds, village pond, plantation, etc. Self employment would be created by providing the people with cash support in the form of direct livelihood activities like agriculture, animal husbandry and enterprise development. It will help in checking of migration.

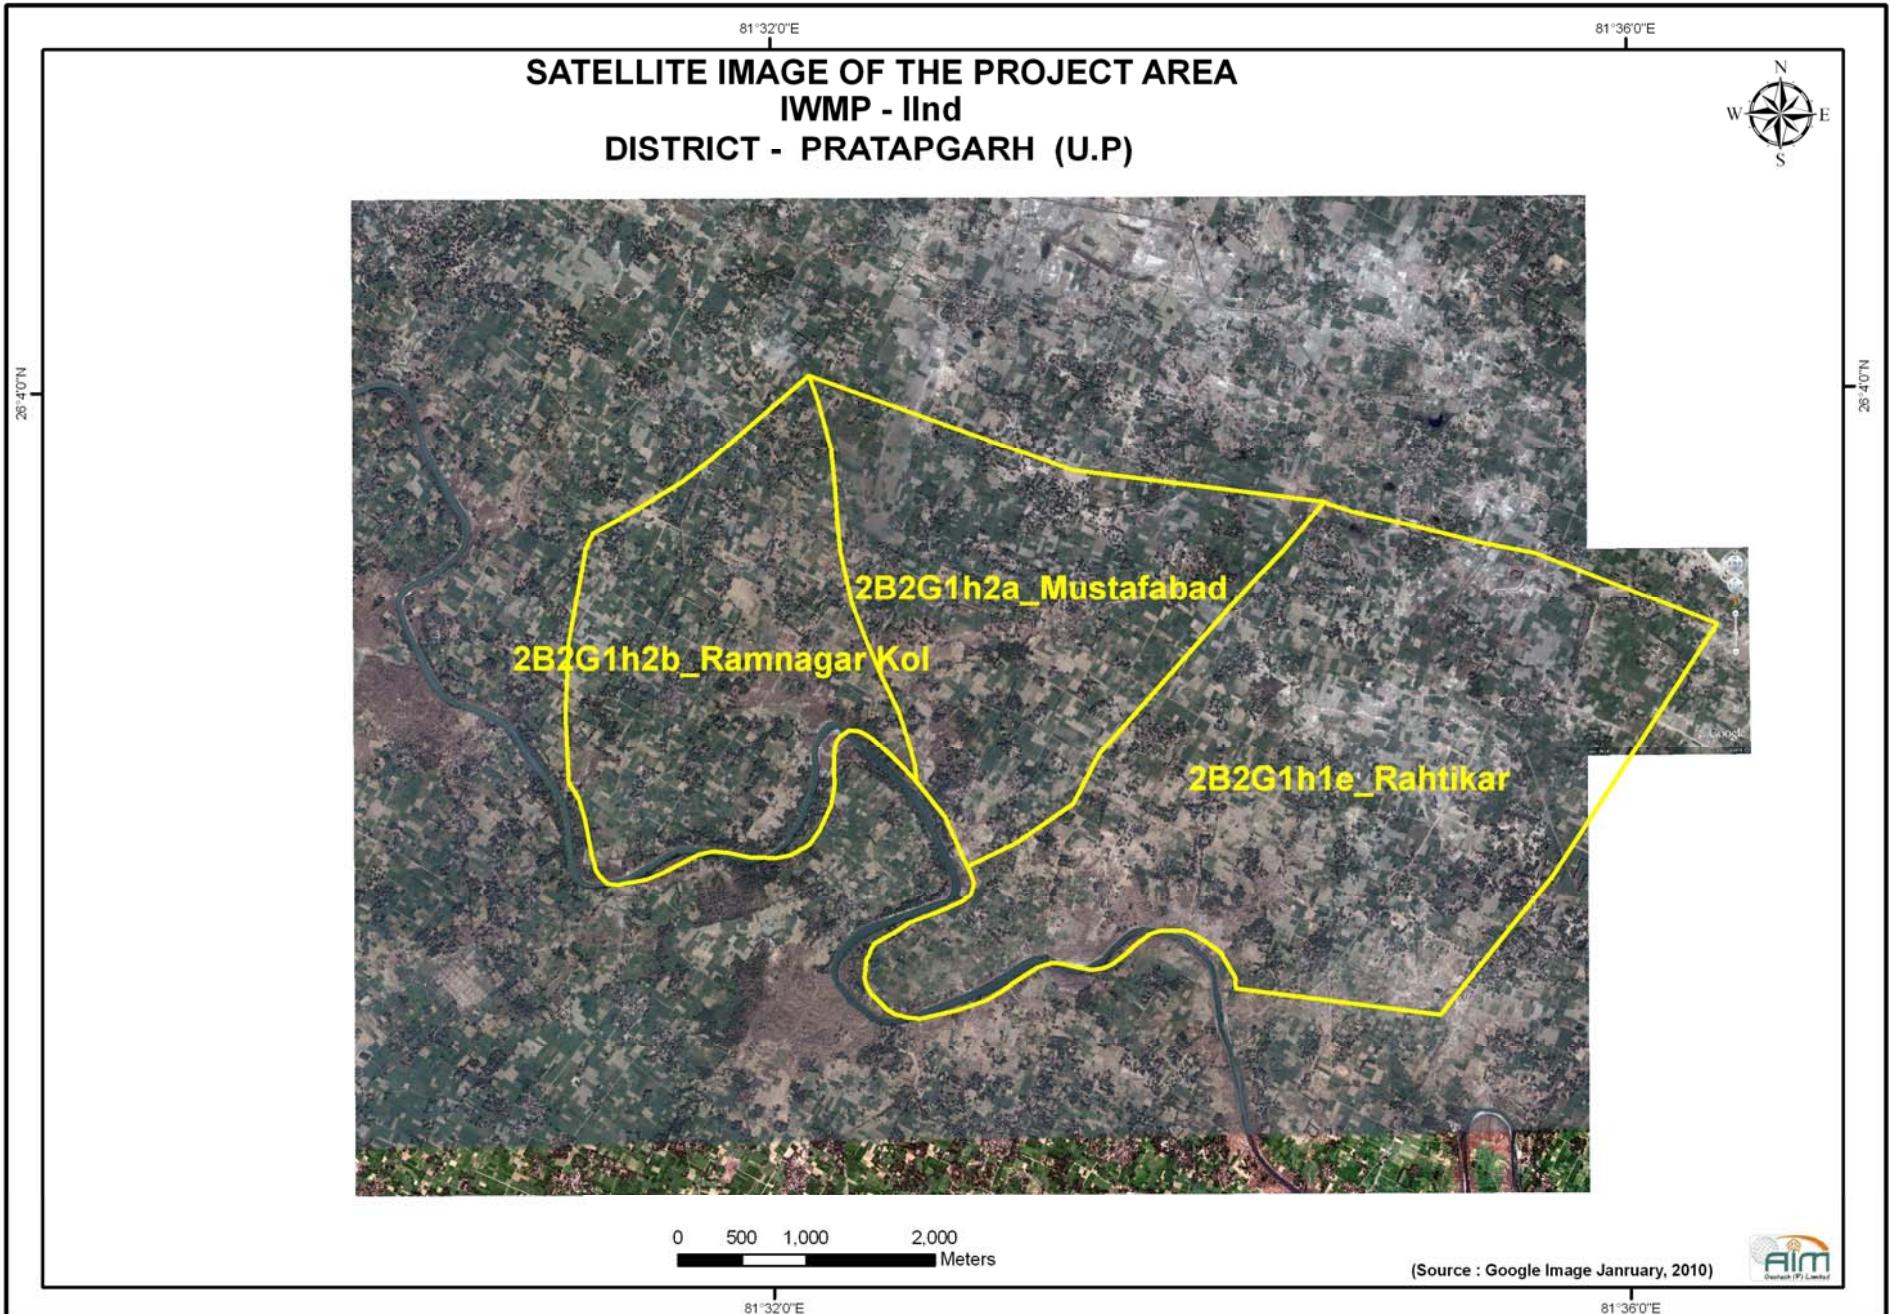

#### **9.2: Other expected outcome**

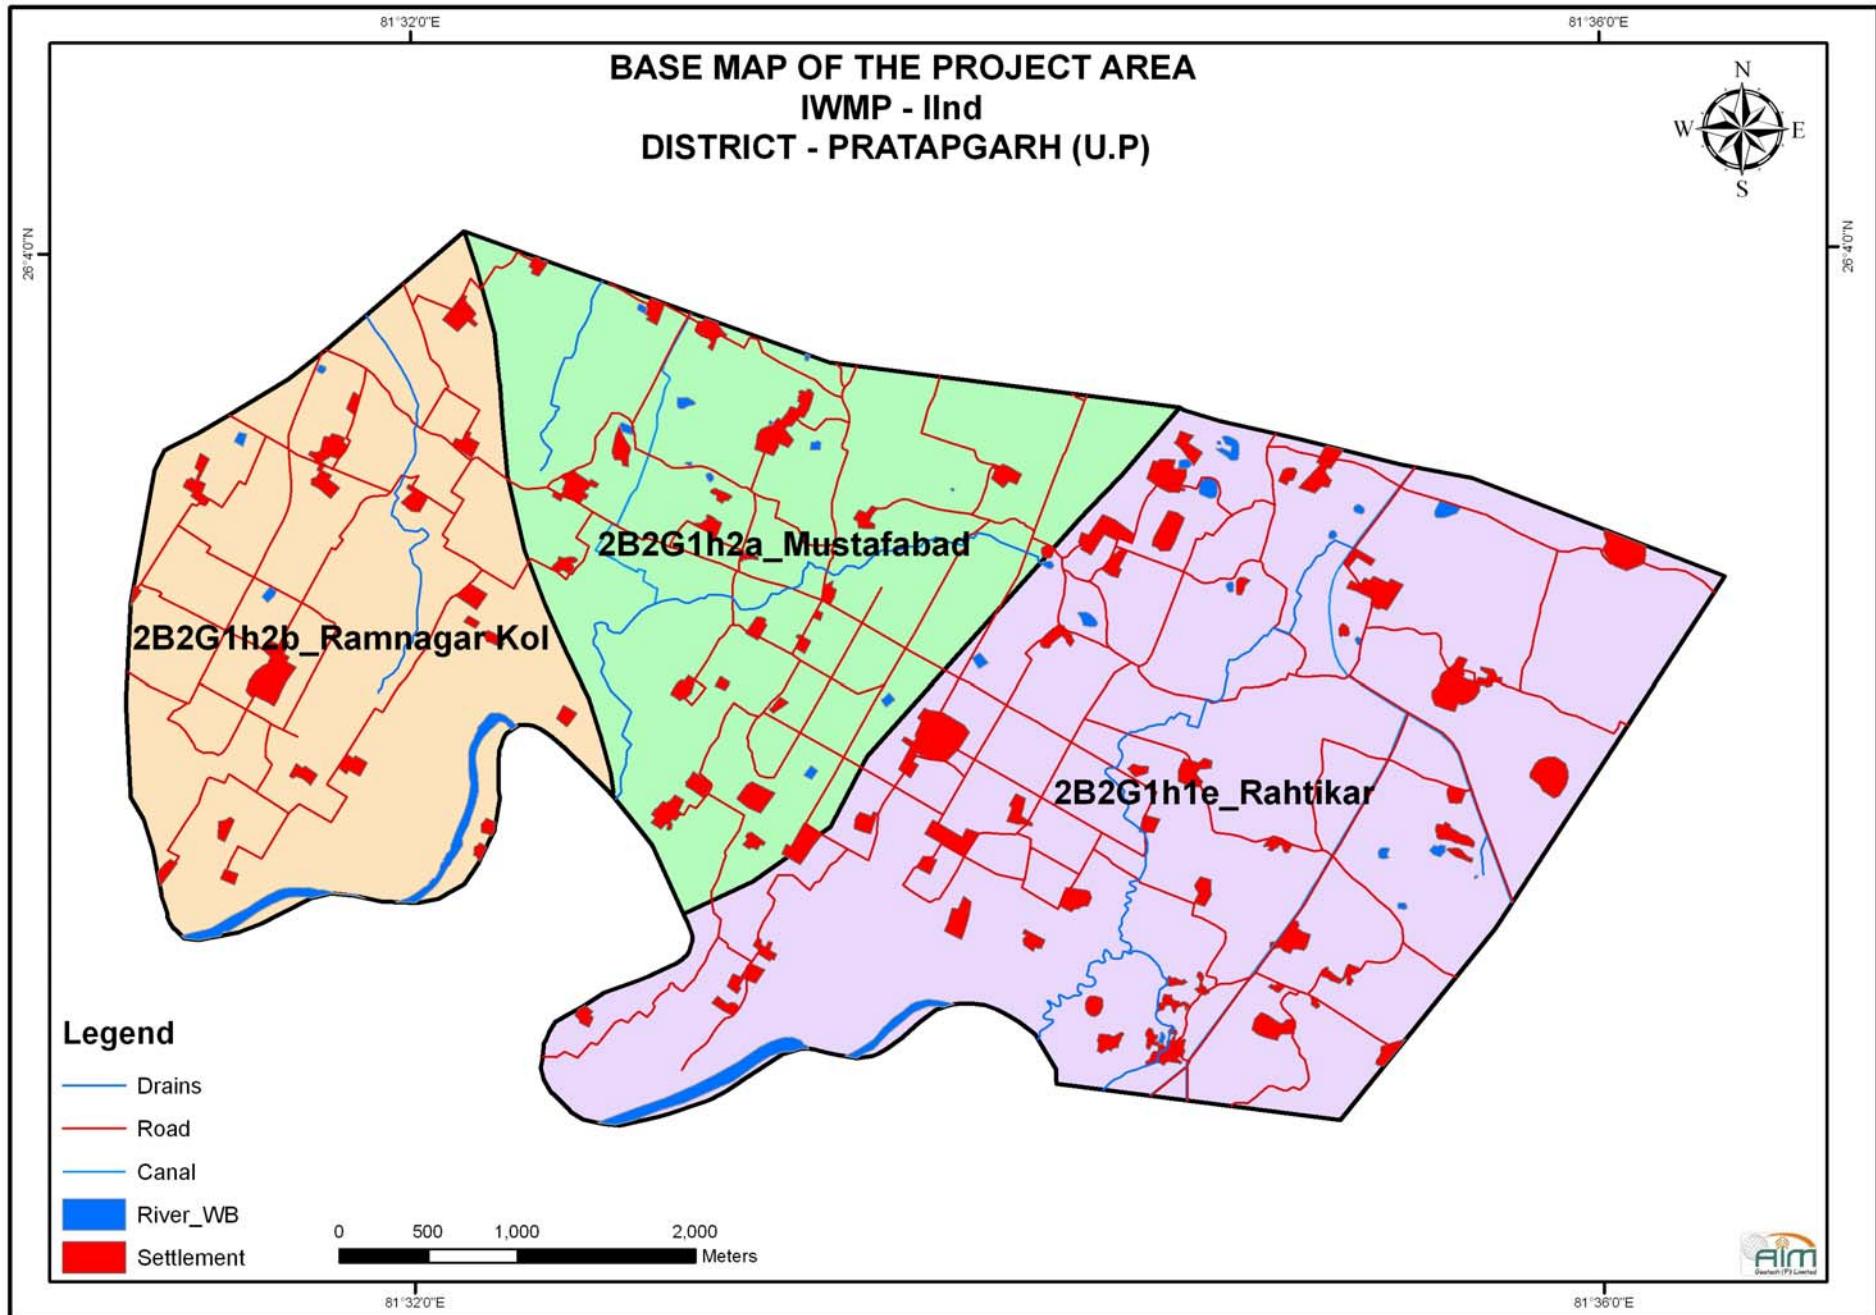

**Table 9.1: Expected Benefits:**

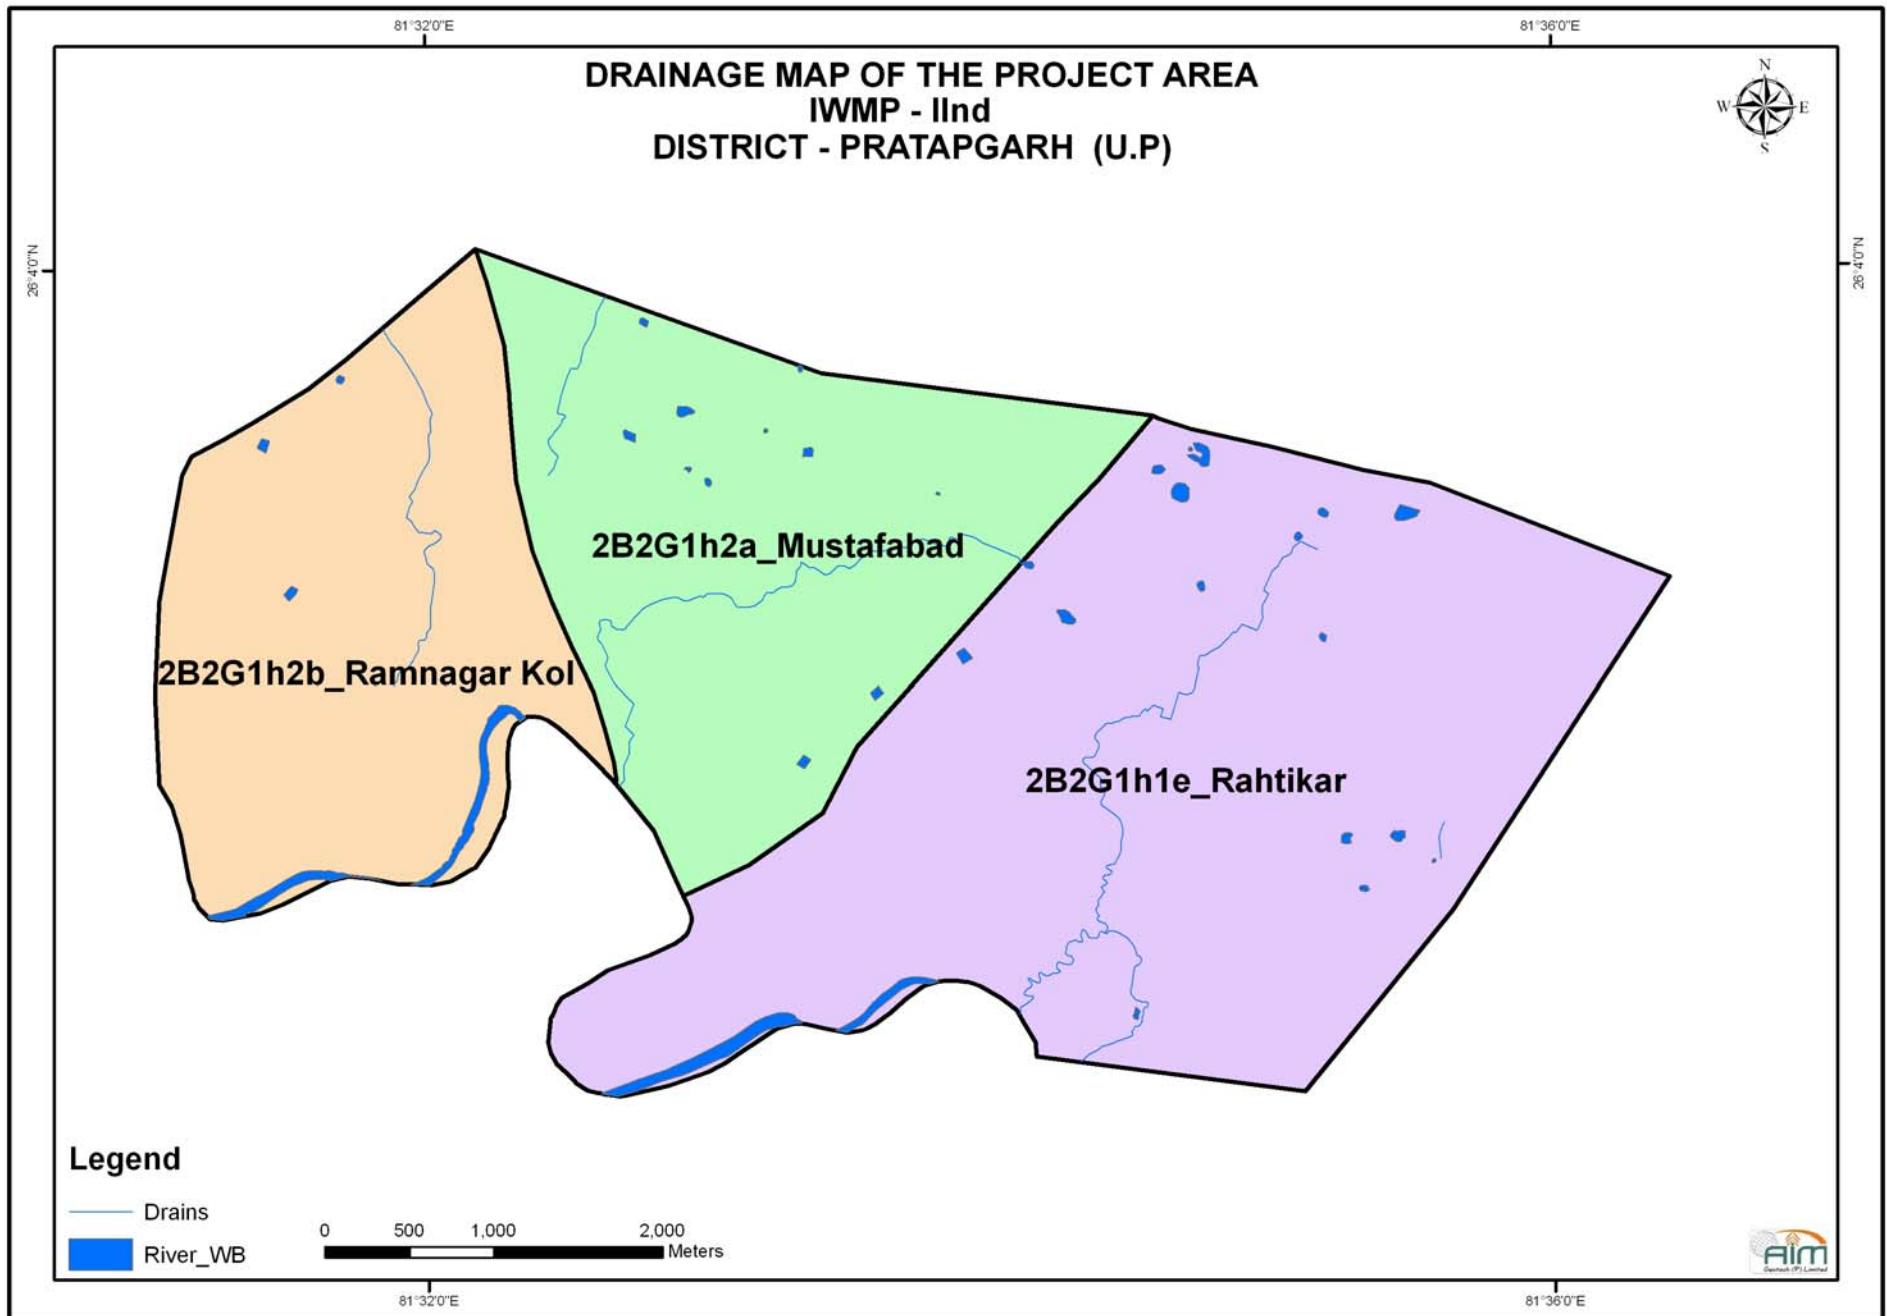

S.No.	Particulars of Items	Unit	Pre Execution	Post Execution
1	Gross Cultivated area	ha	2404	+20-25%
2	Cropping Intensity	%	139%	+20-25%
3	<b>Agricultural Production</b>			
a	<b>Food Production</b>	qtls	26844	+20-25%

4	Average Income from Agriculture	Rs/ha	19886	+20-25%
5	Milk Production/per year	Liter	534750	+15-20%
6	Irrigated/Rainfed Area	ha	428/1976	488/1916
7	Additional Area under Agro/Horti/Forestry	ha	-	+16 ha
8	Employment generation Man days	No	100	+25 to 30%
9	Women Benefitted by SHGs and IGA	No	-	+17
10	Value of land Rs/ha	Rs in lacs	3-4	+1 to 2
11	Average ground water table BGL	M	14-16	-1 to 2

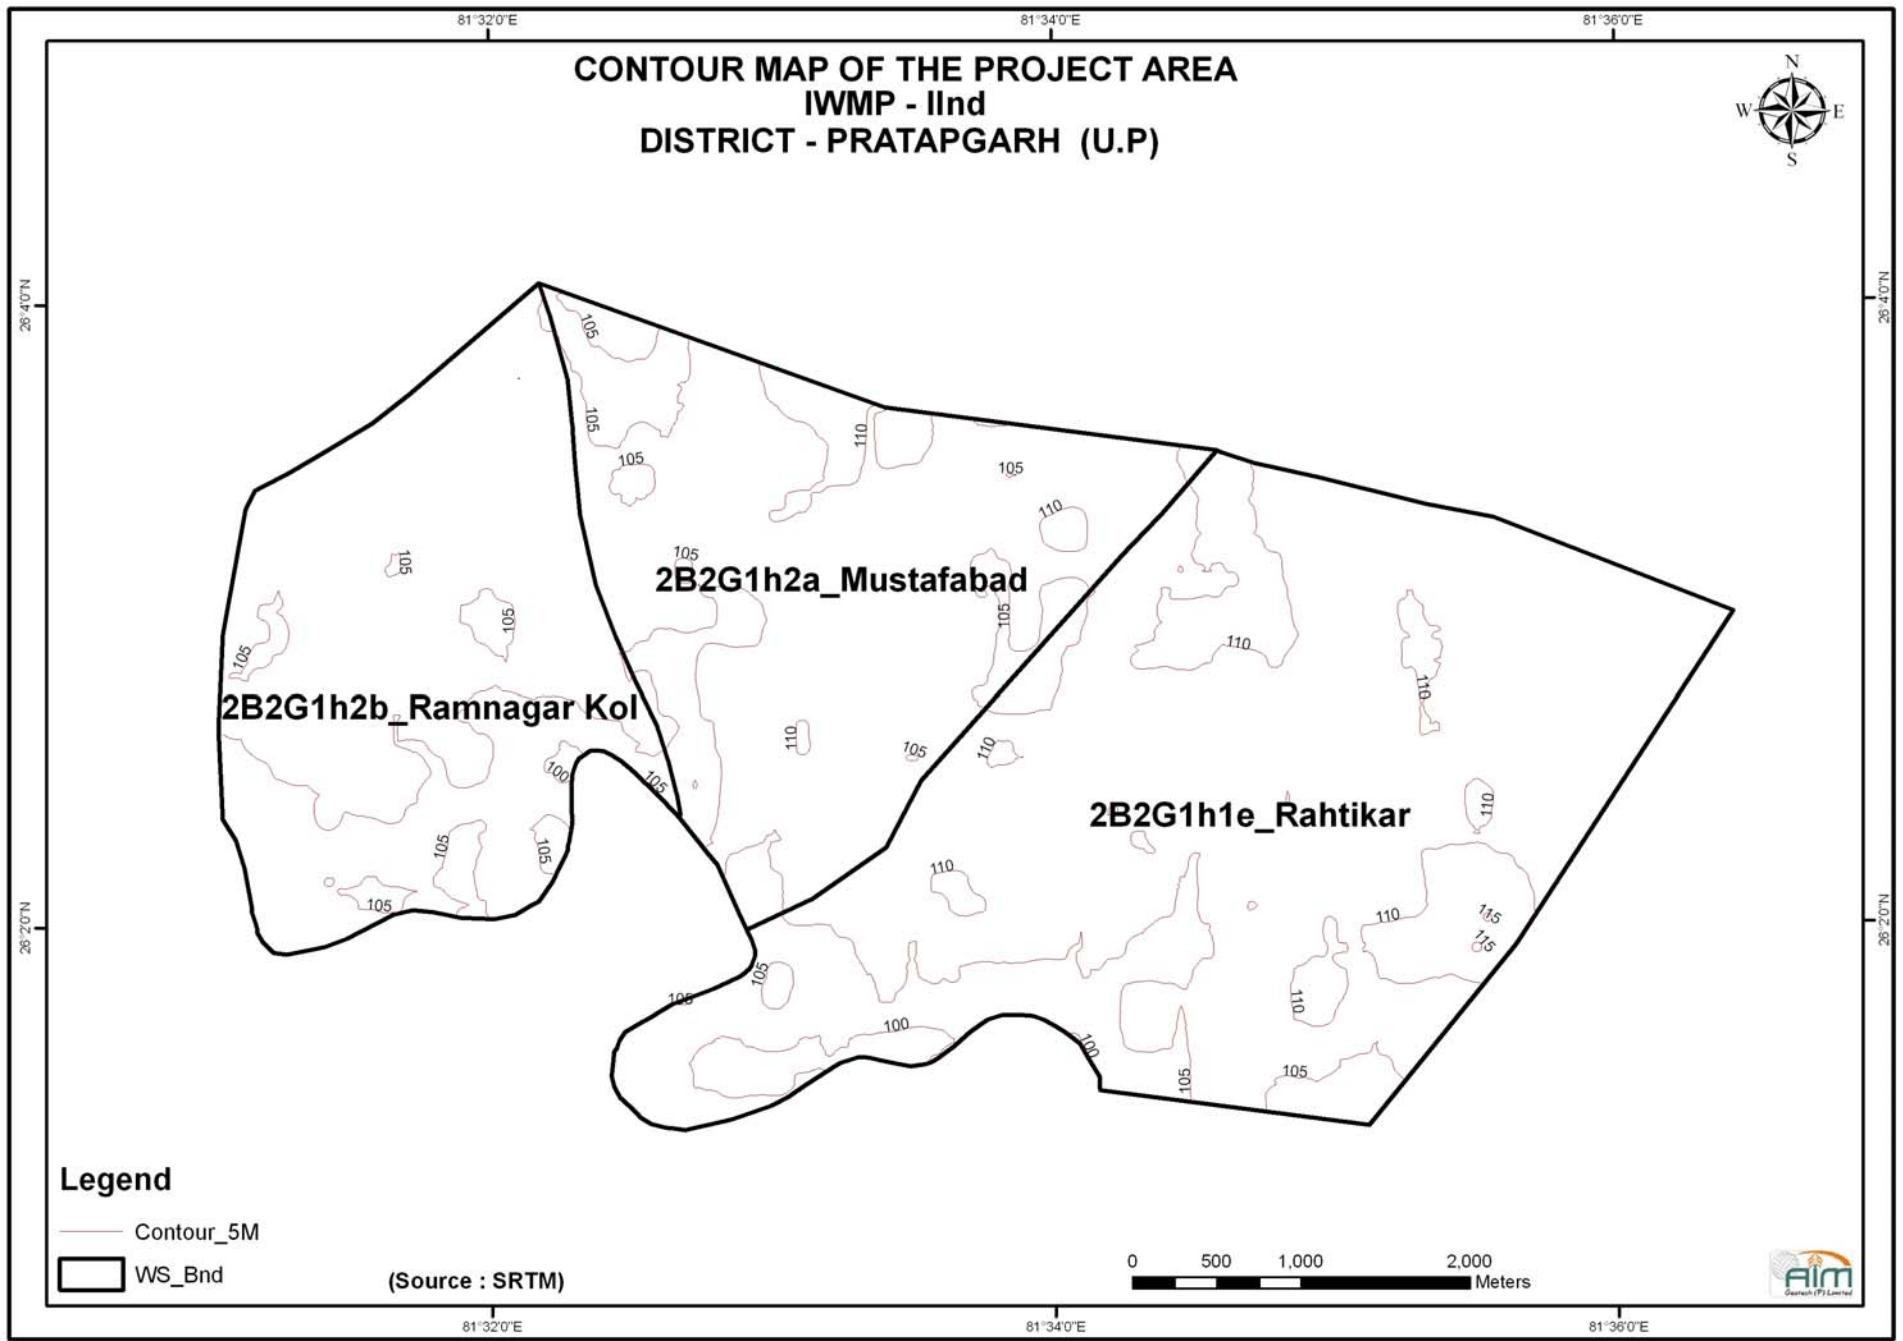

# MAPS

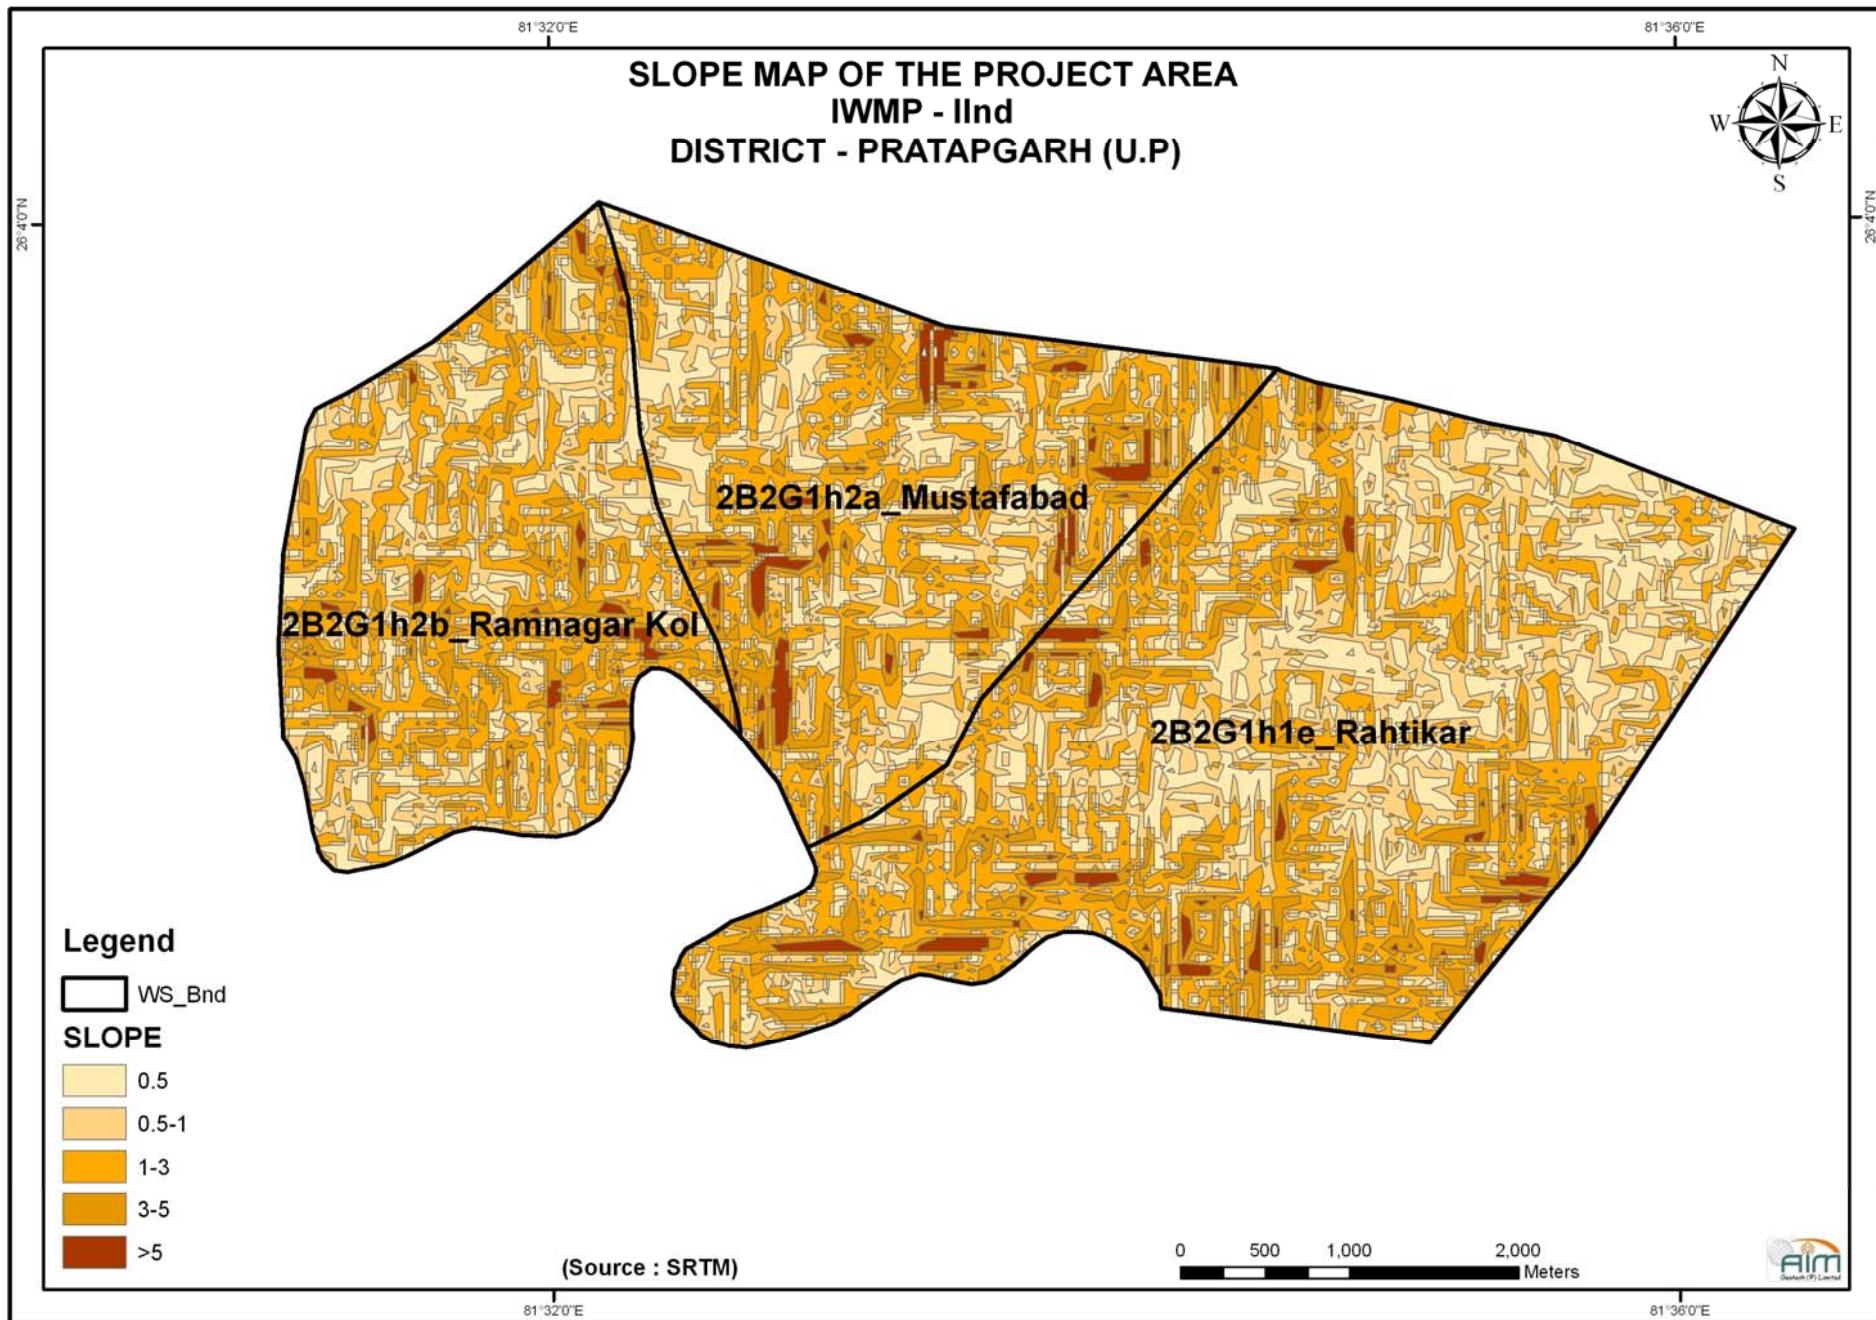

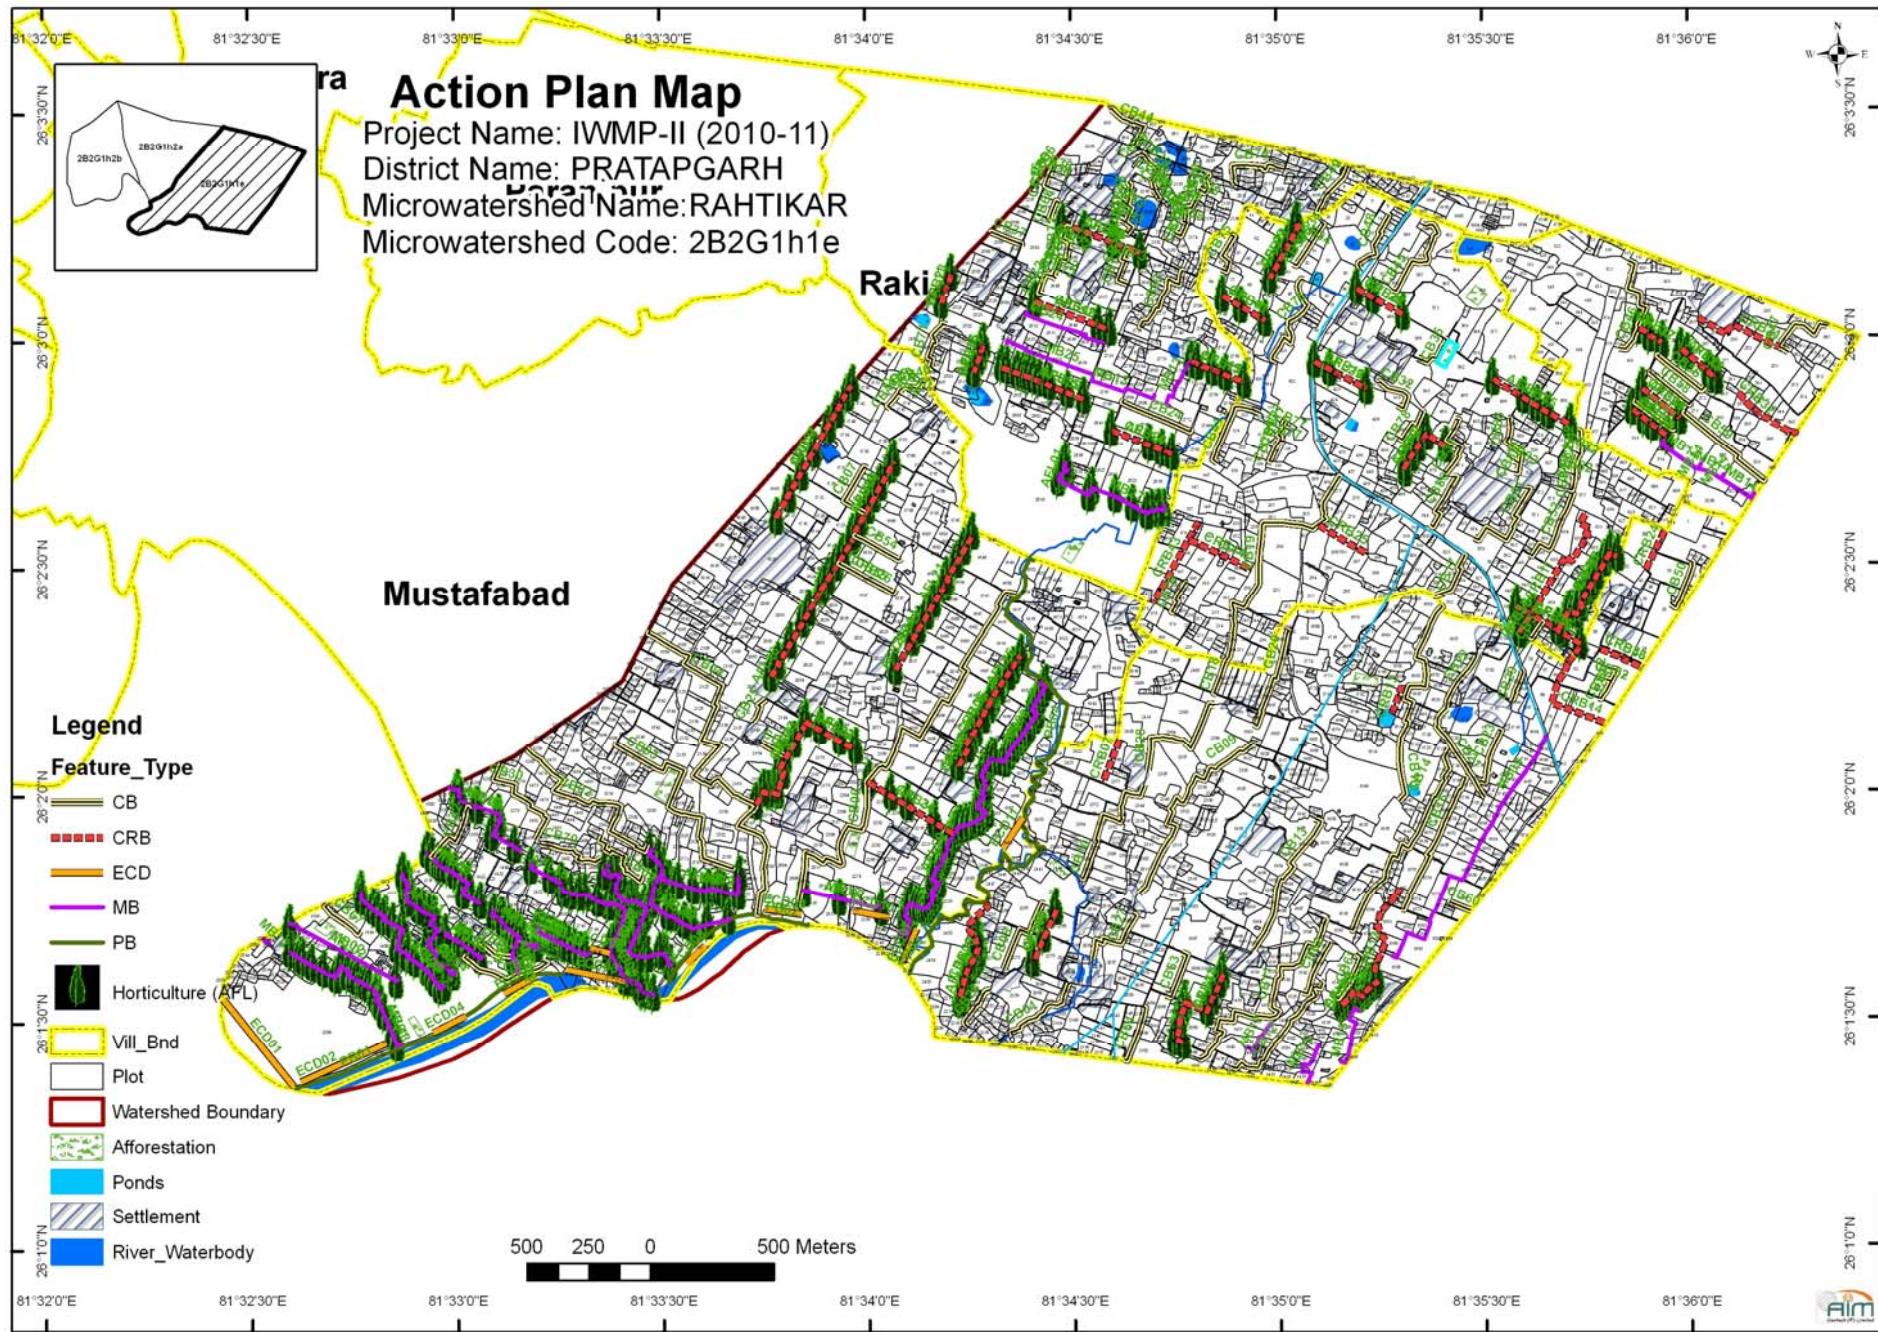

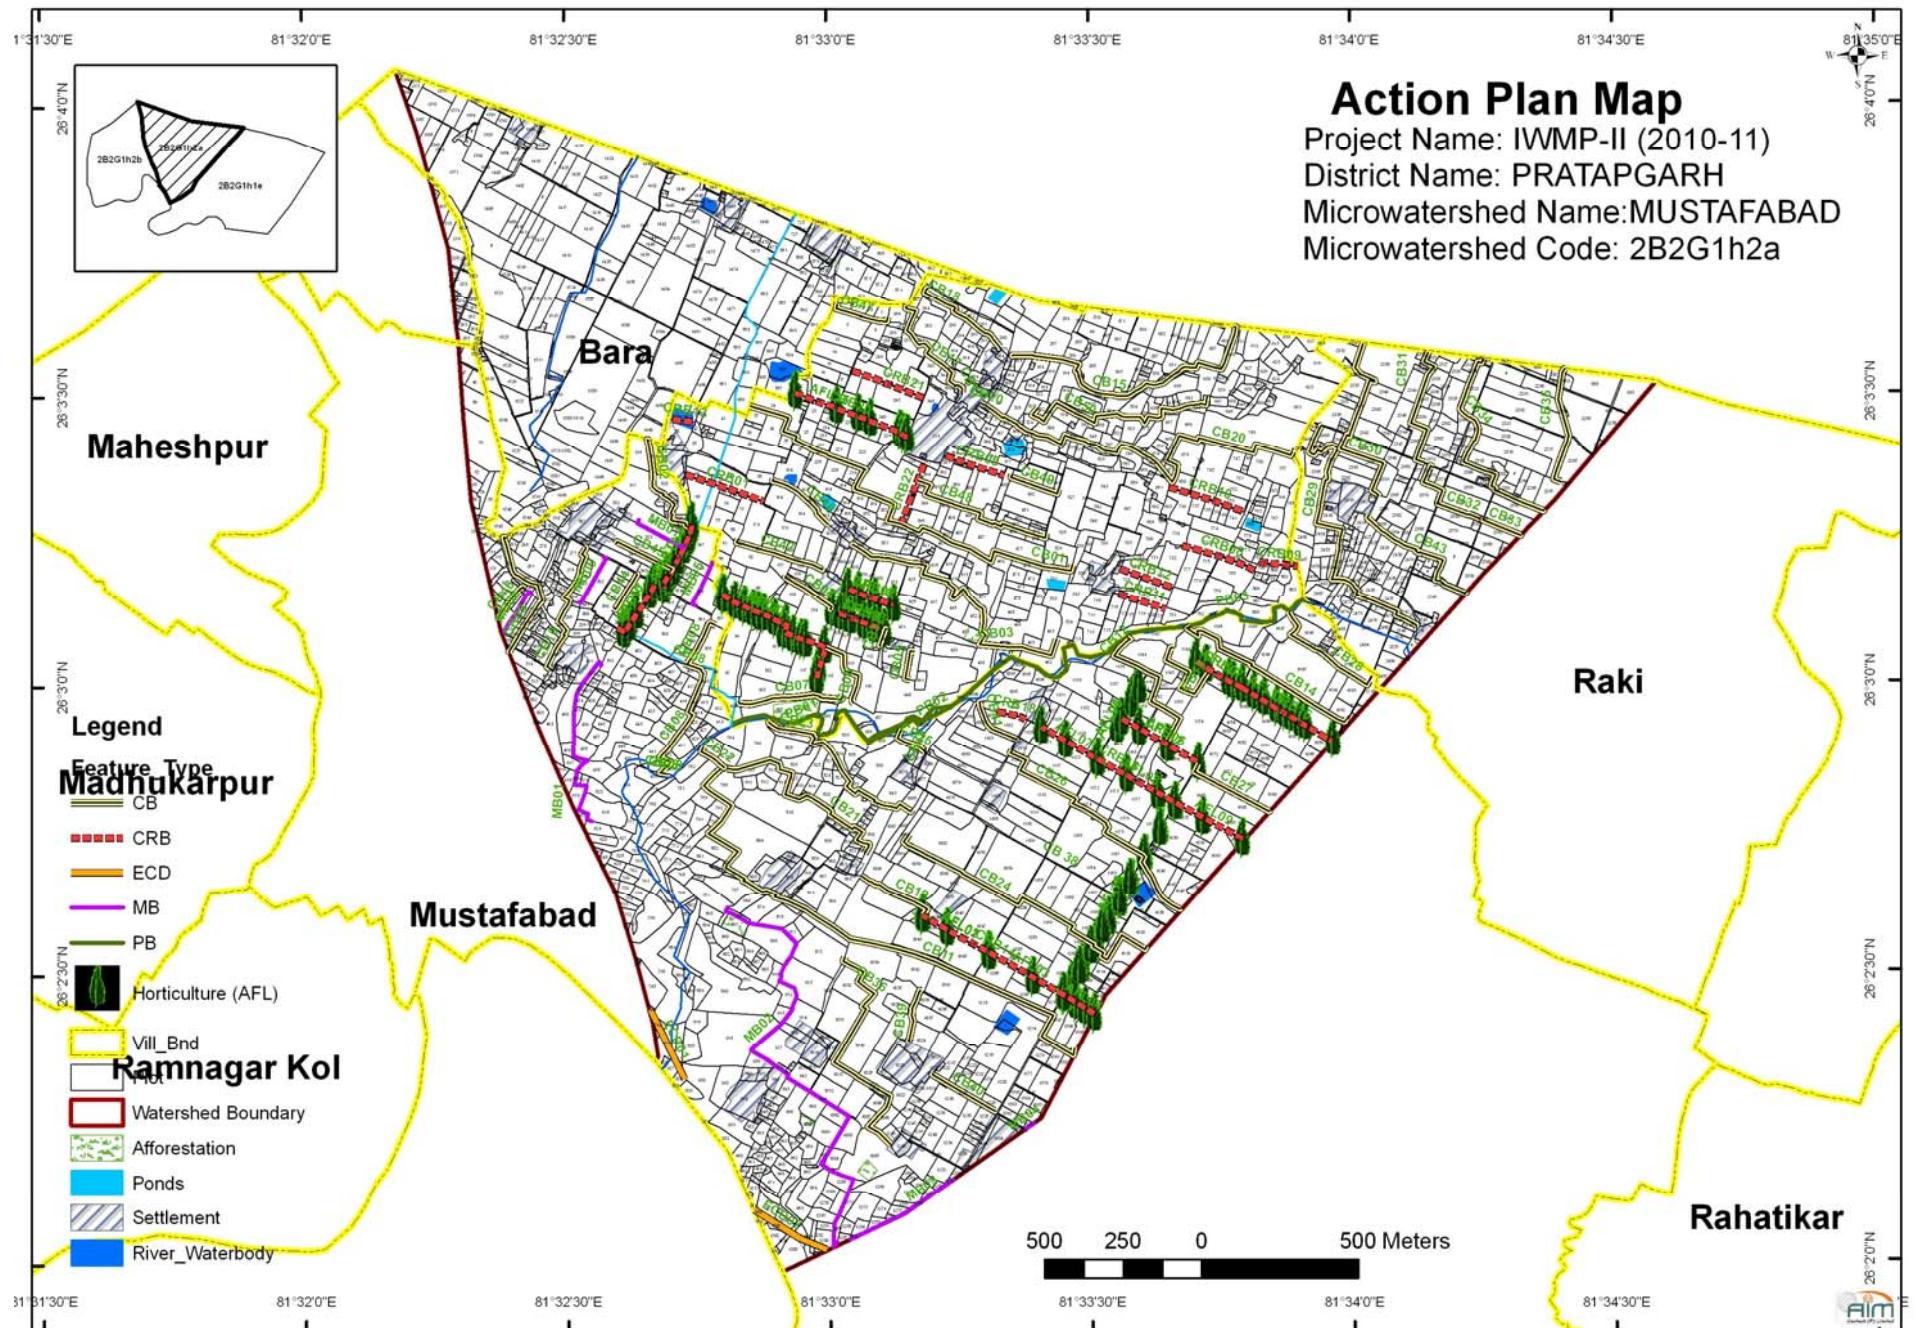

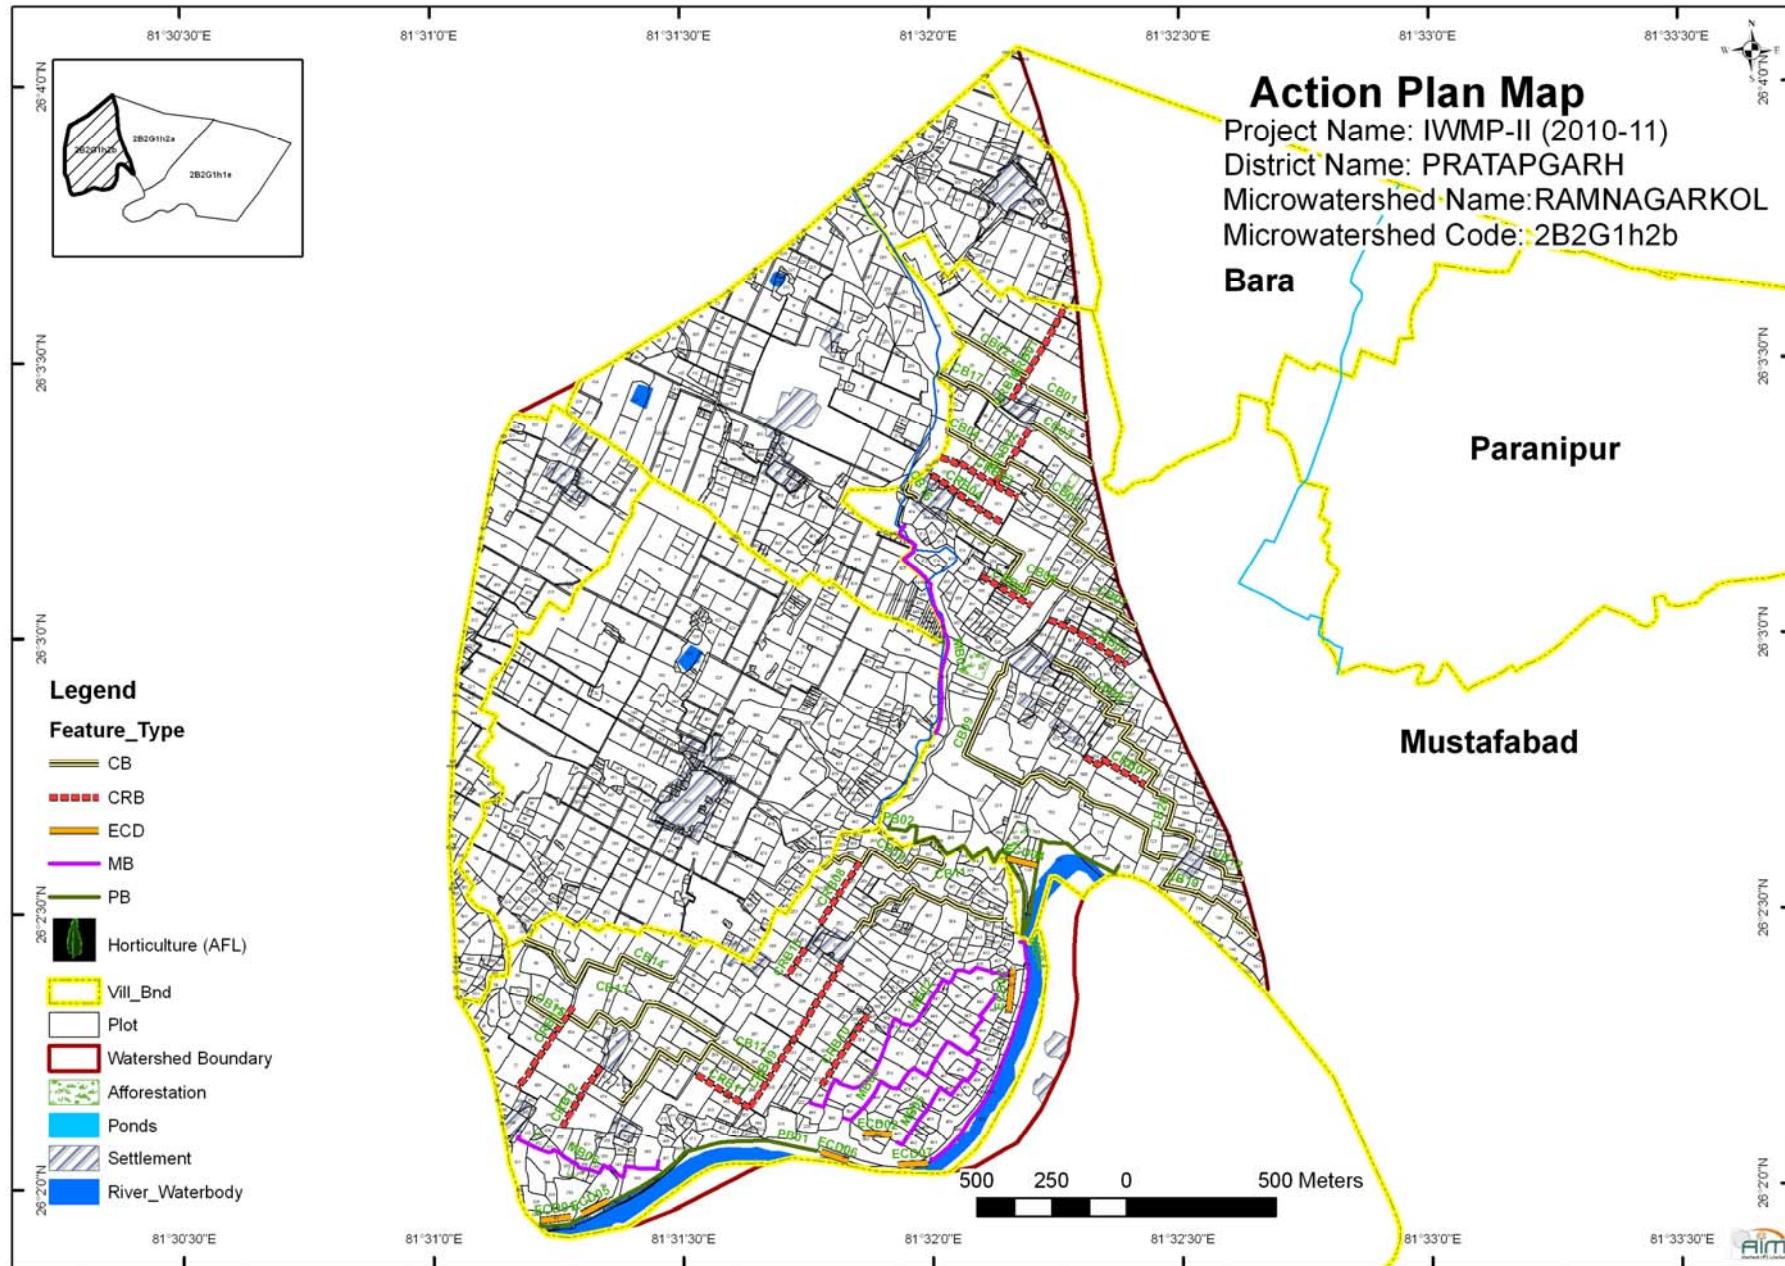

## PREPARATION OF DPR

Detail Project Report of Integrated Watershed Management Programme (IWMP-2<sup>nd</sup>) has been prepared through base line/ bench Mark survey for physiographic, climate, soil, land use, vegetation, hydrology and socio economic data collection. PRA exercises have been done to collect primary data. Secondary data have been collected from Revenue, Statistics department, Statistical Magazine of the district, department of animal Husbandry development etc. Toposheets on 1:50,000 scale, online high resolution satellite image and SRTM data has been used. Suggestions related to technical & specific inputs were taken from external expert in preparation and drafting of detail project report.
