| <b>Chapter-2</b>   | <b>General Details of the District</b> |
| 2. 1 Net Treatable Area of the District                    | 22                                     |
| 2. 2 Detail of Previous IWMP Projects till now             | 22                                     |
| 2. 3 Status of Lalitpur IWMP-22                            | 24                                     |
| 2. 4 Rainfall and Temperature Detail in Project Area       | 27                                     |
| 2. 5 Slope of Project Area                                 | 28                                     |
| 2. 6 Soil Type of Project Area                             | 29                                     |
| 2. 7 Soil Depth of Project Area                            | 30                                     |
| 2. 8 Land use Pattern in Project Area                      | 31                                     |
| 2. 9 Government, Private and Other Landuse in Project Area | 33                                     |
| 2. 10 Status of Migration in Project Area                  | 35                                     |
| 2. 11 Status of Irrigation in Project Area                 | 37                                     |
| 2. 12 Production and Productivity of Major Crops           | 40                                     |
| 2. 13 Status of Horticulture                               | 41                                     |
| 2. 14 Forest Area, Vegetation Cover and Pasture Area       | 43                                     |
| <b>2. 15 Livestock</b>                                     | 46                                     |
| 2. 16 Requirement of Fooder in Project Area                | 48                                     |
| 2. 17 Year Wise Milk Production in Project Area            | 48                                     |
| <b>2. 18 Livelihood Status of Landless Peoples</b>         | 49                                     |
| 2. 19 Livelihood Status of Farmers                         | 52                                     |
| 2. 20 Detail of Migration from Project Area                | 60                                     |

|                                    |                                 |
|------------------------------------|---------------------------------|
| <b>Chapter-3</b>                   | <b>Institutional Management</b> |
| 3. 1 Description of P.I.A          | 64                              |
| <b>3. 2 Details of P.I.A Staff</b> | 65                              |

प्रमाणपत्र-1

वाटरशेड विकास दल / कार्यदायी संस्था-भूमि संरक्षण इकाई, सिंचाई एवं जल संसाधन विभाग, जनपद-ललितपुर के कार्यकर्ताओं द्वारा इस आशय का प्रमाणपत्र दिया जाता है, कि परियोजना के अन्तर्गत प्रस्तावित गतिविधियां परियोजना क्षेत्र के लाभार्थियों की रुचि राय, सक्रिय सहभागिता तथा वाटरशेड समिति एवं ग्रामसभा से विचार विमर्श कर आपसी सहमति के आधार पर तैयार किया गया है।

प्रमाणित किया जाता है कि निम्न हस्ताक्षरित द्वारा समेकित वाटरशेड प्रबंधन कार्यक्रम-22 (IWMP-XXII) जनपद-ललितपुर के लिये उपयुक्त एवं आवश्यकता आधारित गतिविधियों का समावेश लाभार्थियों की सक्रिय सहभागिता तथा वाटरशेड समिति तथा ग्राम सभा से विचार विमर्श कर आपसी सहमति के आधार पर तैयार किया गया है। प्रस्तावित परियोजना तथा विस्तृत परियोजना प्रस्ताव डी०पी०आर० का अनुमोदन सम्बन्धित वाटरशेड समिति/ग्राम सभा से प्राप्त कर लिया गया है। आईडब्लूएमपी-22 स्वीकृत वर्ष- 2011-12 की वाटरशेड विकास की योजना तथा विस्तृत परियोजना प्रस्ताव डी०पी०आर० तकीनीकि रूप से सुदृढ़ एवं व्यवहारिक है।

हम प्रस्तावित योजना की स्वीकृति प्रदान किये जाने एवं कार्यन्वय की संस्तुति करते हैं।

## EXECUTIVE SUMMARY

### Work Plan (D.P.R), Integrated Watershed Development Programme

#### Block-Mahrauli

#### Executive Organisation/ Soil Conservation Department Lalitpur

The Lalitpur (IWMP-21) Project is located in Mahrauli Block of Lalitpur District in Uttar Pradesh State and is part of Yamuna/Dahina Betwa/Jamuni Watershed. The project is a cluster of 09 micro-watersheds with 2C2D3h3b, 2C2D3h3c, 2C2D3h3d, 2C2D3h3e, 2C2D3h3f, 2C2D3h4a, 2C2D3h4b, 2C2D3h4g, 2C2D3h4h being their Codes. The total geographical area of the project is about 7763 ha out of which 4960 ha area has been taken to be treated under Integrated Watershed Management Programme (IWMP) year 2011-12. Each micro-watershed is given a name, the name and its code are given in the table below:

| MWS Name      | MWS Code |
|---------------|----------|
| Saidpur-1st   | 2C2D3h3b |
| Saidpur-2nd   | 2C2D3h3c |
| Rameshara     | 2C2D3h3d |
| Satwasa       | 2C2D3h3e |
| Gadauli Kalan | 2C2D3h3f |
| Bhaunta       | 2C2D3h4a |
| Simariya      | 2C2D3h4b |
| Talau         | 2C2D3h4g |
| Devran Kalan  | 2C2D3h4h |

The Latitude and Longitude of project area falls between 78°40'47.072"E to 24°29'48.167"N and from 78°46'20.518"E to 24°23'7.41"N and Micro Watershed wise detailed latitude and longitude is given in the table 2.3. The project Lalitpur IWMP-22 is a cluster of 09 Micro Watershed consisting 17 villages, 12 Gram Panchayat (GP) with total Geographical Area of 7763 ha out of which 4960 ha area is taken to be treated with total project cost of Rs. 595.2 Lakhs under the Integrated Watershed Management Programme (IWMP) year 2011-12 .

All Micro Watersheds fall in agro-climatic zone of Bundelkhand Zone. The Project is situated at an elevation of 399 m to 383 m above mean sea level. The project area has been divided into five slope category i.e. 0 - 0.50%, 0.51 – 1%, 1 – 3% , 3-5% and >5%. Area under slope category 0.5-1% is 776 ha, 0-0.50% is 1863, 1-3% is 4270 ha, 3-5% is 698 ha and more than 5% is 155 ha.

The Total Population within Project area is 27374, out of which 14182 male and 13192 Female. While coming to SC/ST the population is 7707 out of which male population is 3949 and 3760 are female.

The Land use pattern of the project is discussed in the DPR. In this project, out of 7763 ha of geographical area, coming to Agriculture Area total area under agriculture is 8418 Ha, out of which 4513 ha is net sown.

The average rainfall of the area in 2012 is 784 mm. The summer months May and June are the hottest with temp ranging 41-37 deg. Cent. and lowest temperature with 5 deg. Cent. are recorded in January/February months. Expected run-off is, worked out as ~40% of the average annual rainfall i.e 313.68 mm/year with an average soil loss 10-14 tonnes/ha/year. The present agriculture and other scenario is unable to provide enough employment opportunities round the year so it leads to unemployment and distress migration of about 527 persons from the project area annually.

Integrated Watershed Management Programme (IWMP) is prioritized on the basis of thirteen parameters namely Poverty Index, Percentage of SC, Actual Wages, Percentage of small and marginal farmers, Ground water status, Moisture Index, Area under rain fed agriculture, Drinking water situation in the area, Percentage of the degraded land, Productivity potential of the land, Continuity of another watershed that has already been developed/treated, Cluster approach for plain or for hilly terrain. The Weightage Point of the project as per above parameters is 85.

House Hold Survey, PRA, PSA, FGDs and PIPs were conducted to assess the people's/farmer's needs/ preferences, problems thrust area of farming system, livestock production and their suggestions were also invited. After technical analysis the exercise of Participatory Net Planning (PNP) was conducted to finalize the proposed location for various activities using GPS under the head of Land Development (Afforestation, Horticulture and Agriculture), Soil and Moisture Conservation (SMC), Water Harvesting Structures (WHS) alongwith proposed intervention in the field of farming system, livestock production, micro-enterprises etc. After the whole exercise, Annual Action Plan (AAP) of Capacity Building, Livelihood Activities, Production System and Microenterprises, Watershed Development Works, Convergence have been prepared. The Watershed Committees (WCs) have been formed at Gram Panchayat level, SHGs (Shelf Help Groups) and User Groups (UGs) have also been constituted. Farmers were also informed about the amount/rate of contribution as per the

category of farmers for various activities, user charges and Watershed Development Fund (WDF). Farmers were willing to participate in the IWMP Programme and ready to contribute accordingly for availing/sharing the benefits.

Productivity of all the important crops under Kharif, Rabi and Zaid is proposed to be increased substantially. Crop wise details have been described in the DPR. Similarly, milk and other livestock produce is also expected to increase, details of which are given in the chapter -'Livestock Population and Productivity (Pre and Post Project status).

The present average family income of assetless is Rs. 10000-15000/- per annum and for farmers Rs. 25000-30000 /-, with the proposed intervention under the project, the income is expected to increase to Rs. 20000-25000/- and Rs. 35000-40000/- respectively after completion of the project.

The NRM activities were proposed as per the need in all 09 micro-watersheds of the project. The total cost of these NRM activities amounts to Rs. 383.31 Lakhs , out of which the amount available from IWMP is 333.31 Lakhs, the remaining amount Rs. 50 Lakhs is proposed to be met from various programs of Govt (MGNREGA, Horticulture). The details of budget from IWMP, Convergence, Phasing into 5 years is given in table below:

## Yearwise Physical and Financial Target/Work Plan

## Chapter-1

# Project Background

### District Profile

#### 1. 1 District Profile

Lalitpur District is one of the districts of Uttar Pradesh state of India. Lalitpur district is a part of Jhansi Division. Lalitpur is the main town and administrative headquarters. The district occupies an area of 5,039 km<sup>2</sup>.

Lalitpur District is a part of Jhansi Division and was carved out as a district in the year 1974. It is connected to Jhansi District by a narrow corridor to the northeast, otherwise almost surrounded by Madhya Pradesh state, an example of an salient(a geographical term).

This district has a number of historical and cultural places like Devgarh, Seeronji, Pavagiri, Devamata, Neelkantheshwar at Pali, Machkund ki Gufa. Lalitpur town has variety of places like many Hindu & Jain temples. Raghunathji (Bada Mandir), Shivalay, Boodhe Babba (Hanumanji), Tuvan Mandir for Hindus & Bada Mandir, Ata Mandir & Kshetrapalji for Jains are famous temples.

The district forms a portion of the hill country of Bundelkhand, sloping down from the outliers of the Vindhya Range on the south to the tributaries of the Yamuna River on the north. The extreme south is composed of parallel rows of long and narrow-ridged hills. Through the intervening valleys the rivers flow down over ledges of granite or quartz. North of the hilly region, the granite chains gradually turn into clusters of smaller hills.

The Betwa River forms the northern and western boundary of the district, and most of the district lies within its watershed. The Jamni River, a tributary of the Betwa, forms the eastern boundary. The Dhasan River forms the district's southeastern boundary, and the southeastern portion of the district lies within its watershed.

### Need and Scope for Watershed development programme

Watershed Development Programme is prioritized on the basis of thirteen parameters namely Poverty index, Percentage of SC/ST population, Actual wages, Percentage of small and marginal farmers, Ground water status, Moisture Index, Area under rainfed agriculture, Drinking water situation, Percentage of the degraded land, Productivity potential of the land, Continuity of another watershed that has already been treated, and Cluster approach for the area. For

#### 1.5 Weightage for the Selection of Watershed

**Weightage Criteria (for score):**

| Project name | Weightage |    |     |    |   |    |     |      |    |    |    |     |      | Total |
|--------------|-----------|----|-----|----|---|----|-----|------|----|----|----|-----|------|-------|
|              | i         | ii | iii | iv | v | vi | vii | viii | ix | x  | xi | xii | xiii |       |
| I.W.M.P-22   | 7.5       | 5  | 5   | 10 | 0 | 0  | 10  | 7.5  | 10 | 15 | 0  | 15  | 0    | 85    |

## Chapter-2

### General Details of the Project Area

#### 2.1 Net Treatable Area of the District

| Net Treatable Area of the District |                      |              |                       |                   |                  |                                       |   |                 |                    |

## Chapter-3

### Institutional Management

#### **3. 1 Description of P.I.A**

The Project Implementing Agencies (PIA) is selected by an appropriate mechanism by the State Level Nodal Agency (SLNA) for Integrated Watershed Management Programme (IWMP) in Uttar Pradesh. The PIAs are responsible for implementation of watershed project. These PIAs may include relevant line departments, autonomous organizations under State/ Central Governments, Government Institutes/ Research bodies, Intermediate Panchayats, Voluntary Organizations (VOs).

### 3.4 Watershed Committee (W.C)

It is a committee that is constituted by Gram Sabha to implement the watershed project with technical support of WDT in the village. This committee is registered under society Registration Act 1860. The Gram Sabha of the village selects the chairman of the watershed committee with the secretary who will be a paid functionary.

## Chapter-4

### Study and Interpretation of Problems

#### 4.1 Problems of Watershed and Their Solutions

| Problems of the watershed  | Probable solution/ treatment measures   |
|--|---|
| Moistures Stress-Drought conditions  | Soil and Moisture Conservation.   |
| Erosion hazard and Land degradation  | Soil and water conservation/Erosion control measures.   |
| Excess runoff  | Runoff harvesting Structures.   |
| Low fertility of soil  | Use of farmyard/green manure/Vermi and NADEP compost and bio-agent/bio-fertilizers etc.   |
| Ground water depletion/Low ground water DPR  | Field/Contour bunding, Gully plugging, Check dam, Water Harvesting  |
| Format, poor quality of ground water   | Structures, Ground water recharging structures, Farm Ponds, Percolation Tanks etc.  |
| Low cropping intensity   | Multi-crop production,  |
| Lack of technical knowledge  | Intensive Training and Capacity Building along with Exposure visits of all the stakeholders of the project.   |
| Lack of irrigation facilities  | Enhancing irrigation facilities by augmenting surface storage.  |
| Low productivity of crops  | Use of high yielding varieties of seed and latest package of practices of Agricultural production.  |
| Low availability of drinking water for human as well as animals                          | Augmenting groundwater recharge, surface water storage, ponds and Masonry check dams etc.   |
| Overgrazing  | Control grazing, development of pasture and grassland   |
| Poor vegetative cover  | Improving and enhancing vegetation and forest cover.  |
| Poor/low productive breeds of miltch cattle Animals                                      | Improvement of animal breed by Artificial Insemination and natural Service and self-employment of Paravets.   |
| Lower milk production  | Breed improvement, balanced nutritional feeding using green fodder and ..Proper rationing.  |
| Lack of feed & fodder availability   | Production of Green fodder and balanced feed.   |
| Non availability of wood/fuel  | Enhancing vegetation and forest cover and improving common property Resources.  |
| Lack of proper market facilities   | Improving access to markets by linkages of road sand Value addition of the products.  |
| Lack of educational, transportation, medical & health care facilities                    | Improvement and augmentation of educational, transportation, medical& Healthcare facilities.  |
| Poor and uneconomical Livelihood activities Low wages and Lack of employment opportunity | Enhancing profitable livelihood activities, wages opportunities by Improving labor oriented soil and water conservation works, livelihood, self-employment, micro-enterprises and income generating activities. |

| Problems of the watershed                            | Probable solution/ treatment measures   |
|--|---|
| Small land holdings and Low income of the households | Improving crop productivity, multi-cropping and household production  |
| Migration from the project area                      | Reduction of migration by enhancing wages opportunities by improving Labor oriented soil and water conservation works self-employment and income generating activities. |

#### 4.2 Problems of Related to Soil Erosion/Soil/Water Conservation

| Sr.No | Name of MWS   | Code of MWS | Area affected due to different types of water erosion(ha) |      |       |       | Run off (mm/ha/year) | Soil loss (Tonn/Ha/Year) |
|-------|---------------|-------------|---|------|-------|-------|----------------------|--------------------------|

## Chapter-8

### Cost Estimation and Budget

#### **Monitoring and Evaluation:**

Monitoring of the project will be done at each stage and dit will be carried out for both process and outcome. Some community members will be trained and will be involved in participatory monitoring of various parameters and processes and the crop yields. The intervention, expenditure and other information will be displayed in the micro watershed through wall writing, besides trained community members, PIA/DWDU will also monitor the physical and financial progress of watershed development programme. Frontier technologies viz. GIS and Remote Sensing techniques will be used by the PIA/DWDU for monitoring and evaluation. The PIA shall submit quarterly progress reports (countersigned by President of Watershed Committee (WC) to DWDU for further submission to the SLNA. About 1% of the total budget will be used on this activity.

#### **Plan for Evaluation**

Watershed development activities bring both tangible and intangible benefits. In order to quantity the benefits, impact analysis has been proposed.

#### **Theme**

It is presumed that as a consequence of watershed development acitivities there will be noticeable change in socio-economic status of inhabitants, cropping intensity, ground water recharge, crop diversification, fuel and small timber availability, livestock composition and milk production etc. These indicators can be gauged over bench mark data both at the beginning and at the end of the project with in the watershed.

#### **Observation**

The following indicators will be taken into account for quantative and qualative assessment. For the purpose, detailed questionnaires will be prepared and field observation will be carried out.

- Duration of availability of drinking water/irrigation and ground water recharge.
- Irrigation frequency and area under irrigation.
- Changes in cropping pattern and cropping system in the farmers fields alongwith productivity and incomes.
- Soil health.
- Satellite monitoring for vegetation cover and other parameters.

- Livestock composition and productivity.
- Periodic pest and disease monitoring will be done in major crops.
- Socio economic aspects including resource inventory.

## Chapter-9

### Capacity Building

Capacity Building is the process of assisting the group or individuals to identify and address issues and gain the insights, knowledge and experience needed to solve problems and implement change.

There is a realization in the development sector that there is a need to appraise the success of development interventions by going beyond the conventional development targets and measures of success (e.g. in the form of commodities, goods and services) to take into account improvements to human potential. Capacity building of stakeholders is also increasingly viewed as an important factor in developmental projects that involve participation of stakeholders at all levels for effective implementation of projects.

#### **9.1 Year wise Expenditure of Capacity Building**

| Component                          | Nos. of Training | Total No. of Trainees | Unit/ | 2011-12       |                     | 2012-13        |                     | 2013-14       |                     | 2014-15       |                     | 2015-16       |                     | TOTAL       |                     |     |

## Chapter-10

### Monitoring and Evaluation

#### **Monitoring (1% of the Project Cost) Rs. 5.95 Lakhs**

***Regular Monitoring of the project have to be carried out at each stage:-***

- On line monitoring as per format prescribed by the Government of India in the Department of Land Resources(DoLR) is to be done continuously. Monitoring will include process and outcome monitoring.
- The Project Implementing Agency (PIA) will compulsorily submit monthly/quarterly Progress Reports countersigned by the member of Watershed Development Team to the SLNA and WCDC.
- The WCDC will have one member exclusively for monitoring.
- The WCDC will ensure uploading of monitoring data complete in all aspects to SLNA and DoLR as per Format and guidelines issued from time to time.

***Budget provision for Monitoring:-***

Project Fund-There is fund provision 1% of the total Project Cost in the DPR.

- Online monitoring must become a feature of all projects.
- Monitoring should include process and outcome monitoring.
- The PIA shall submit monthly/quarterly progress reports (countersigned by the Watershed Committee (WC) President) to the WCDC for further submission to the SLNA.
- The WCDC will have one member exclusively responsible for monitoring.

***Different streams of monitoring are proposed:-***

- Internal Monitoring by Project Teams (PIA/WCDC)
- Progress Monitoring
- GIS/ Web Based On-Line Monitoring
- Self Monitoring by communities
- Sustainability Monitoring

- Social Audits (atleast one Social Audit Event should be organized on Watershed Committee wise on yearly basis.
- Independent and External Monitoring by independent agencies
- Process Monitoring

***Streams of Monitoring Different Streams of monitoring as prescribed by the Department of Land Resources, Government of India are to be***

- 1)** Internal monitoring by Project Team. The PIA and the WCDC must arrange adequate arrangement for internal monitoring of the Project.
- 2)** Progress of the Quarter must be reported in time without delay and must be monitored so that the time schedule as per approved DPR is strictly followed.
- 3)** GIS Web based On-line monitoring must be done as per laid down directives as well as instructions from SLNA and DoLR, Government of India issued from time to time.
- 4)** Self Monitoring by Communities is to be done from time to time.
- 5)** Sustainability of the outputs due to interventions in the project area should be monitored.
- 6)** Arrangements for Independent and external monitoring as well as social auditing should be appropriately made.
- 7)** Time to time monitoring of anticipated outcomes such as Soil Loss, Ground Water Recharge, amelioration of environmental parameters, Production enhancement, Income generation, Employment generation, increase in vegetative cover, status of Water Harvesting Structures, additional area brought under irrigation, etc. must be recorded and reported to WCDC/SLNA

**Evaluation (1% of the Project Cost) Rs. 5.95 Lakhs**

- 1) Evaluation will include physical, financial and social audit of the work done.
- 2) Panel of evaluating agencies.
  - a. At Central Level there is a panel of evaluating agencies. A minimum percentage of evaluations and impact studies will be carried out by National Level agencies.
  - b. There is a SLNA level panel of evaluators approved by the Departmental Nodal Agency at SLNA Level. This panel includes only institutions not individuals.
  - c. The panel to be entrusted for evaluation of the project will not belong to the project area.
  - d. Evaluators will evaluate the project work as per specific instructions of the Government of India as well as of the SLNA.
  - e. The Fund release by Government of India on a favourable report from the evaluators.
  - f. An amount of Rs 1% of the Project Cost is provided in the DPR for evaluation of the project.

Evaluation will be done on the completion of following phase :-

- I. Preparatory phase.
- II. Work Phase.
- III. Consolidation Phase.

## 10.2 Micro Watershed wise Financial Breakup of Evaluation Component(Year wise 1% of Project Cost)

## Chapter-11

### Consolidation and Withdrawal Strategy

Success of the programme depends on various watershed interventions and sustainability can only be achieved through active participation of community. It will be on capacity building and empowerment of stakeholders. The WC, SHGs, UGs etc. will be established, trained and strengthened to continue development after withdrawal of PIA. By building economic activities through CBOs community participation will be sustained. The PR&D approach alongwith demand driven interventions will reduce dependency on subsidies. Contribution from the community will be ensured for the entire activities to develop sense of belongingness and the contribution will be deposited to the account of watershed development fund (WDF). It will also be strengthening through donations from the individuals and institutions and the CBOs will be trained to run watershed as business model on sustainable basis. The tangible economic benefits alongwith empowerment by PIA will empower the CBOs to develop and sustain the watershed activities after withdrawal of the PIA. Community organization will withdraw the money from the WDF to maintain the assets created during the implementation phase.

#### **The consolidation phase will also include:-**

1. To prepare the project completion report.
2. Documentation of success stories.
3. Making films, leaflets, bulletins and the lessons learnt.
4. The expenditure will be done as per the common guidelines for watershed development projects.
5. The completion report will reflect the development on following aspects:-
  - a. Productivity enhancement.
  - b. Nutritional Security.
  - c. Risk minimization (Integrated farming system, water harvesting and protected cultivation, value addition and improved marketing).
  - d. Profitability.
- e. Livelihood security (skill enhancement capacity building, increased employment in agriculture and allied enterprises, reduction in migration etc.).
